

# Fast Track Azure AI Proof of Concept (POC)

**What:** A fast track, high value engagement for delivering AI and machine learning proof of concepts.

**Why:** Fast track demonstration of value, significant downstream project savings and early user acceptance.

**How:**

- Led by senior applied data scientist / transformation specialist.
- Weekly workshops and regular readouts to sponsor and solution end-users.
- Cornerstone deliverable for successful agile iterative "in-production" solutions.

**Azure solution components**

**AlgoSpark Delivery Framework: POC and Beyond**

Phase	Deliverables	Month 1	Month 2	Month 3	Month 4	Month 5	Month 6	Beyond
POC	Opportunity review and workshops with “what / why / how / value” appraisal.							
	Prioritised AI development plan (programme plan) with stakeholder maps and RACI							
	Initial project plan and business case for highest priority opportunity							
	Initial analytics, early proof of concept and prototype development plan.							
Iteration Zero	Prototype with minimum viable product feature set. Updated business plan and project plan.							
Pilot & Production	Pilot and additional feature development using agile iterative development cycles (4 weeks per cycle). Delivery of “Version 1” production ready solution with roll-out plan.							
Support	Solution support (if required)
