

SAP Azure Landing Zone Accelerator

Build a Secure, Scalable and SAP-Ready Azure Foundation Including SAP RISE Integration

WHAT IT IS

SAP Azure Landing Zone Accelerator is a high-impact engagement designed to rapidly establish a secure, scalable and SAP-ready Azure foundation, aligned with the **Microsoft Cloud Adoption Framework (CAF)** and **SAP on Azure best practices**. The engagement supports both **SAP on Azure** and **SAP RISE** scenarios by delivering the Azure landing zone required to securely integrate **SAP-managed RISE environments** with enterprise services such as Data & AI platforms, integrations, identity, security and corporate connectivity.

DELIVERY OPTIONS

ESSENTIAL

2-4 weeks

A fast, streamlined landing zone ideal for:

- SAP RISE environments requiring secure Azure connectivity
- Initial SAP migrations or pilot initiatives
- Smaller or less complex SAP landscapes

Delivers the **core Azure foundation** needed to enable secure integration, governance and enterprise connectivity with SAP and SAP RISE environments.

ENTERPRISE

4-8 weeks

A full enterprise-grade landing zone designed for:

- Large or complex SAP landscapes and SAP RISE scenarios
- Multi-environment architectures (DEV, QA, PRD, DR)
- Advanced governance, security and compliance requirements

Delivers a **robust, scalable and highly governed Azure platform** to integrate SAP and SAP RISE with Data, AI, integrations and enterprise services at scale.

WHO IT'S FOR

- Organizations adopting **SAP RISE** that require Azure integration
- Customers migrating **SAP S/4HANA, ECC or BW to Azure**
- Enterprises operating SAP in hybrid or multi-cloud models
- IT and SAP leaders seeking a **standardized, enterprise-ready Azure foundation**

BUSINESS OUTCOMES

- Azure landing zone ready for SAP and SAP RISE integration
- Secure, governed connectivity between SAP, enterprise systems and Azure services

- Reduced integration, migration and operational risk
- Consistent governance, security and identity across environments
- Clear executive roadmap for SAP cloud and RISE adoption

WHAT'S INCLUDED

- SAP Azure Landing Zone architecture and design
- Azure landing zone for SAP and SAP RISE integration
- Management group and subscription model
- Hub-and-spoke network topology and hybrid connectivity
- SAP-aligned shared file system architecture (Enterprise option)
- Azure Center for SAP solutions for SAP lifecycle and landscape management (Enterprise option)
- Azure Monitor for SAP solutions for SAP observability and monitoring (Enterprise option)
- Identity and access integration with Microsoft Entra ID
- Security baseline and governance controls aligned with CAF
- Landing zone deployment using Infrastructure as Code
- Executive-ready roadmap for SAP and SAP RISE integration

(Scope and depth vary by Essential and Enterprise options)

BENEFITS

- Faster SAP and SAP RISE integration with Azure
- Secure access to Azure Data, AI and integration services
- Reduced platform, security and integration risk
- Standardized and repeatable Azure foundation
- Scalable design to support future SAP innovation

HOW IT WORKS

Assess

SAP and SAP RISE landscape, Azure readiness and integration requirements

Design

SAP-ready Azure landing zone aligned with CAF

Deploy

Production-ready landing zone using Infrastructure as Code

Roadmap

Phased SAP migration and SAP RISE integration plan
