

WEBVETA

Pair your SEO with an intelligent internal search engine – The ultimate winning combination for successful online presence!

< Web Veta / >

DON'T LOSE CUSTOMERS

Your SEO efforts bring users to your websites by ranking up in search engines such as Google, Bing. But, are people finding what they are looking for? Does your website have an advanced internal search for them to search and know more?

DON'T LOSE CUSTOMERS

Or are they just navigating away to the next website in the Google / Bing search results?

Are less user retention, people not being able to find what they are looking for reasons for losing customers

ADVANCED SEARCH FOR YOUR WEBSITES!

Advanced, customizable, easy to integrate!

No SDKs needed!

It's a no-brainer, every website needs an advanced search engine.

ADVANCED SEARCH FOR YOUR WEBSITES!

Use the free-tier full-text search, accurate results from your own website.

Use the basic-tier full-text search, accurate results from across your website, sub-domains and consistent search results.

Search results from multiple sub--domains

A.I BASED MORE RELEVANT

Full-Text + A.I tier for higher accuracy, more accurate than,
normal full-text search!

RAG PREMIUM

Your website users are probably going through lots of lists and have multiple browser tabs, how about giving an answer and even semantic search i.e search based on intent rather than the keywords?

RAG READY PREMIUM

The screenshot shows a web browser window with the address bar containing 'https://www.alightservices.com/#'. The page features a search interface with a dark red header bar containing the word 'CLOSE'. Below this, the text reads 'WebVeta powered by [ALight Technology And Services Limited](#)'. A search input field contains the query 'How can WebVeta help SMEs'. Below the search bar is another dark red header bar with the word 'SEARCH'. The main content area is titled 'A.I generated content:' and contains a paragraph: 'WebVeta can help SMEs by providing a unified and consistent search engine for their websites and apps. It allows SMEs to show relevant content when searched for, which can help turn visitors into customers. Additionally, SMEs can cross-promote with partners and include relevant search results from inter-related government organizations. By using WebVeta, SMEs can improve their search experience, increase customer engagement, and reduce customer care frustration by making their existing content easily accessible.' Below this text, it says '3 results.' and lists three search results, each with a blue URL and a red title: 'https://www.alightservices.com/websearch' with title 'WebVeta - ALight Technology And Services Limite...', 'https://www.alightservices.com/webveta' with title 'WebVeta - ALight Technology And Services Limite...', and 'http://www.alightservices.com/websearch' with title 'WebVeta - ALight Technology And Services Limite...'. At the bottom, there is a pagination control with the text 'First Prev 1 Next Last'.

EASY INTEGRATION

Integration

Copy these into the head and place the HTML element in the body

head:

```
 <script src="https://1.api.webveta.alightservices.com/js/scriptv0.0.2.js" type="text/javascript"></script>  
 <link href="https://1.api.webveta.alightservices.com/css/stylev0.0.1.css" rel="stylesheet" />
```

body:

```
 <a id="ws-btnSearch" data-id="d6d8318e-7594-11ef-83ca-6045bdef87af" href="#">Search</a>  
or  
 <button id="ws-btnSearch" data-id="d6d8318e-7594-11ef-83ca-6045bdef87af" href="#">Search</button>  
or  
 
```

The following are optional but use for faster connections from users browsers:

head:

```
 <link rel="dns-prefetch" href="//1.api.webveta.alightservices.com">  
or  
 <link rel="preconnect" href="//1.api.webveta.alightservices.com">
```

BENEFITS?

Your web visitors can easily find what they are looking for, higher retention!

Your web visitors have more confidence, because you care about providing appropriate, search results and responses rather than asking them to navigate through menus.
