Support

For support with any HarmCheck™ platform integrations, please email info@alphyco.com

What is HarmCheck?

HarmCheck is a SaaS platform that flags harmful and unlawful language in real-time, while guiding users to more collaborative communication. For companies of all sizes and industries, HarmCheck flags damaging language before it is sent, reducing the risk of costly litigation stemming from harmful communication. For individuals, HarmCheck is an ally, elevating awareness around harmful and respectful language while delivering connected and personalized microlearning to improve overall communication.
