Support

For support with any of the Reflect AI platform integrations, please email us at info@alphyco.com

What is HarmCheck AI?

HarmCheck AI™ is a SaaS platform that flags harmful, unlawful and unethical language before you hit "send". Our AI language classifier detects risks in emails prior to send, flags conversational missteps and successes in video meetings in real-time, and upskills individual communication with targeted and personalized microlearning. Reflect works via integrations with your favorite communication platforms (like Gmail, Microsoft Outlook, and Webex).

Who do I contact if I have questions?

If you'd like more information about getting Reflect for your organization, contact sales@alphyco.com. If you need technical support, contact info@alphyco.com.
