

# Automation service for Compliance and Regulation

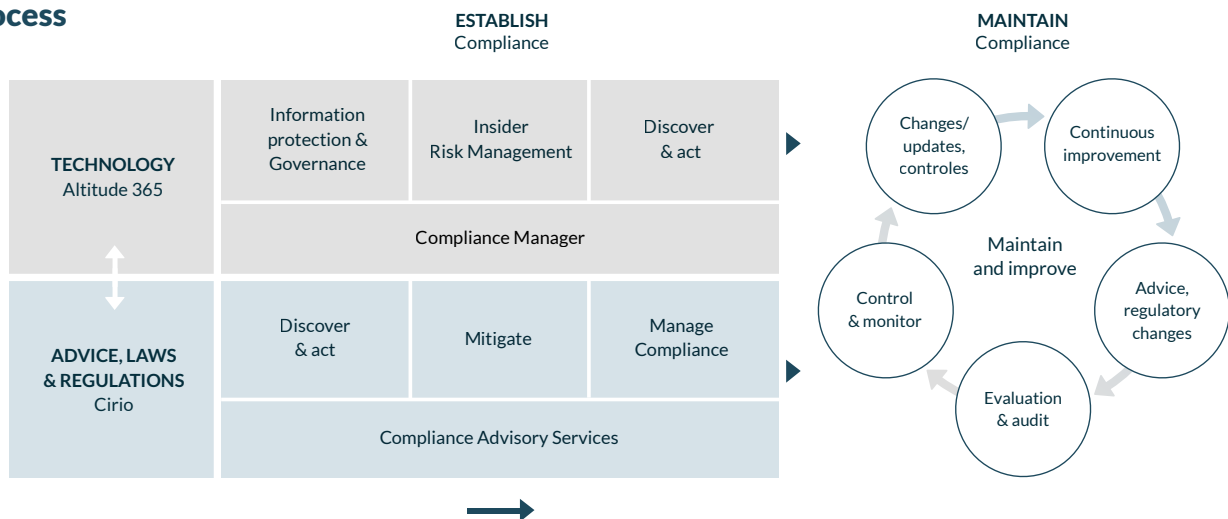

Do you think the compliance landscape is difficult to manage? You're not alone. In order to facilitate we have created an efficient automation service together with one of Sweden's leading law firms

"In the 2021 edition of Board of Directors Survey, management ranked compliance as the greatest risk for their business."

Gartner

Managing compliance is complex and time-consuming. The legal and commercial requirements for compliance and regulation will be in addition, more and more extensive. Today, you must be able to demonstrate compliance and prove liability on an ongoing basis. We meet companies and organizations on a daily basis that express a desire to simplify and streamline the workflow. The result is Compliance & Regulation, which is a Co-Managed automation service delivered by Altitude 365 and Cirio.

## Service Methodology Process

## What can I expect?

You regularly meet altitude 365's and Cirio's experts and receive:

- Legal advice that supports compliance work and includes data protection strategy, data protection policy and processes, information, education and communication.
- Project management of compliance strategy, tactics and compliance work.
- Technical advice and documentation on compliance and compliance issues in Microsoft Compliance Manager.
- Ongoing external monitoring that covers news and changes in Microsoft's compliance functionality, contractual changes, and legal regulatory changes such as GDPR, Schrems II.
- Your own "roadmap" for compliance and regulation work
