

# Provide your workforce with a secure and productive desktop experience from anywhere

## Windows 365 Pilot

### Pilot highlights

Improve your knowledge of cloud-based end-user computing options using Microsoft solutions

Learn how Windows 365 unlocks enterprise hybrid work scenarios to deliver a secure and productive desktop experience from anywhere

Gain insights about your company's hybrid work end-user computing goals and objectives

Pilot Windows 365 Cloud PC provisioning and management in your production environment for selected users

The world of hybrid work is evolving as well as the threats and challenges...

**52% of workers are considering transition to remote or hybrid work**

**50% of workers use a personal device for work**

**25% of organizations have identified unauthorized access to sensitive data as a top security threat**

How are you enabling an elastic workforce, temporary or seasonal workers, part-time or shift workers and people working across company-owned and personal devices like interns, contractors or software developers?

**Enable users to be productive and secure from anywhere, on any device, without compromising IT security**

Hybrid work creates new challenges and new opportunities. With Windows 365, you can provide your users with a personalized, powerful, simple and secure full Windows 11 experience on any device streamed from the Microsoft Cloud.

### Why you should attend

Experience the power of Cloud PC provisioning and management within your own environment.

This pilot will show you how to pilot enterprise hybrid work scenarios and how to provide your workforce with access to a secure and productive desktop experience from virtually anywhere with Windows 365. By attending, you can:

**Learn** how to provision, manage and secure Windows 365 Cloud PCs, running Windows 11, with Microsoft Intune.

**Discover** how to empower IT with easier Windows and device management.

**Secure** your users' identities, data and devices with zero-trust security to achieve greater organizational security from chip to cloud.

**Enable** your users to be productive by delivering a flexible, inclusive, and accessible computing experience for all roles.
