Business Process Innovation for growth with Power Apps

The main trigger and motivation for this initiative for businesses is the **necessity** to acquire competitive advantages based on the digitalization of business processes with a low code / no code approach, with the possibility to rapidly realize connected apps with a standardized approach and by empowering internal teams. The best way to reach this result is to stimulate an active interaction within the company Business, Business Managers and IT People. Altitudo's role is to be the catalyst for this interaction and to boost it through ideas and tips gained through hands-on experience.

CHALLENGE

A successful Digital Transformation and a App Realization strategy for the improvement of business processes need clear goals and a concrete and reasonable implementation strategy.

Clarifying priorities, goals and tools is essential for a successful implementation

SOLUTION

Using the Altitudo experience to propose solutions and steps for:

- HR Self Service productivity and Back to Work support
- Retail Automation and Franchisee Collaboration
- Supplier Collaboration
- Customer Check In and Collaboration

RESULTS

- An analysis that demonstrates where Power Apps can be applied to improve business processes productivity and what are the GAPS to fill
- Possible solutions, technological and business-related, that bring innovations and improvements
- Training Plan
- An action plan and possible initiatives in the short and medium term

Power Apps Fast Start

The proposed activity aims at helping the client understand the benefits of Microsoft Power Apps and other services of the Power Platform suite for Low Code / No Code App realization and analyse the business processes where Microsoft Power Apps can be applied with the goal to produce tangible and competitive advantages.
