Kapla
Your Service Delivery Management solution

Organizations nowadays need to **invest and focus** on **delivering value** to their customers, not on reporting to stakeholders or performing administrative repetitive tasks.

Kapla is our **one-fits-all solution** that brings a comprehensive and flexible delivery framework in a Progressive Web Application.

Built on **leading Open-Source Web technologies**, it is meant to be customized and integrated in your existing ecosystem to fit your methods.

Optimize your activity

- Simplify your time tracking
- Manage your delivery capacity
- Monitor your performance
- Gather meaningful insights

User-Friendly

- 2-clicks Time sheeting
- Efficient Planning Interface
- Customizable interface

Reliable and Scalable

- Accompanies your expansion
- Provides a robust model
- Fits your delivery methods

Agnostic

- Modular data export
- Access from Web and Mobile
- Hosting on Premise or Cloud

Ludovic, Regional Director: "I no longer need to shuffle between spreadsheets, emails, and other tools to keep track of our team performance. Everything is tracked through Kapla and I can finally take decisions based on accurate and timely provided insights."
