

Dynamics 365 Finance

Microsoft Dynamics 365 Finance enables organizations to monitor the performance of financial operations in real-time, predict outcomes, and make data-driven decisions to drive business agility and growth. It empowers users to do business anywhere, anytime, with an intuitive user-interface personalized for their role and preferences.

Key benefits

Enhance your financial decision making

Automate manual tasks and focus on adding value. Use real-time, global reporting, embedded analytics and predictive insights to assess the health of your business, improve financial controls, optimize cash flow and drive growth.

Unify and automate your business processes

Integrate core business processes with financials and automate standard tasks to boost user productivity, support evolving business models and maximize financial performance.

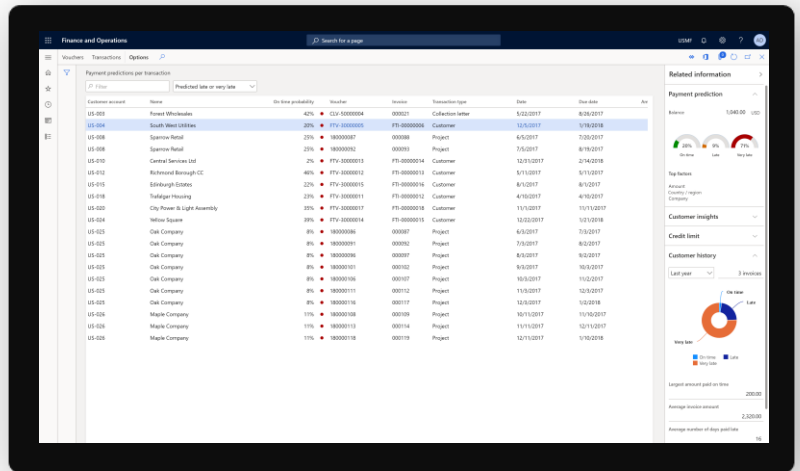

Reduce global financial complexity and risk

Quickly adapt to changing financial requirements with a rules-based chart of accounts and a no-code configuration service that simplifies regulatory and tax reporting, electronic invoicing and payments.

Key capabilities

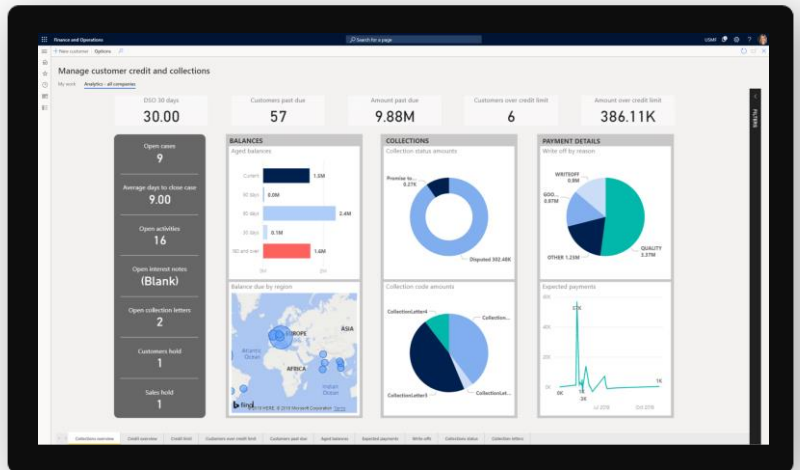

Insights and strategy

Deep data and process integrations across Dynamics 365, Office 365 and partner applications offer a centralized source of information that saves time, facilitates cross-org collaboration and enables faster, more informed decisions. AI-powered capabilities will enable you to quickly understand your company's cash position and proactively act to improve it. Menial tasks are being automated or removed and the barrier of developing or hiring AI-expertise will be bypassed leaving you with insights to move your business forward.

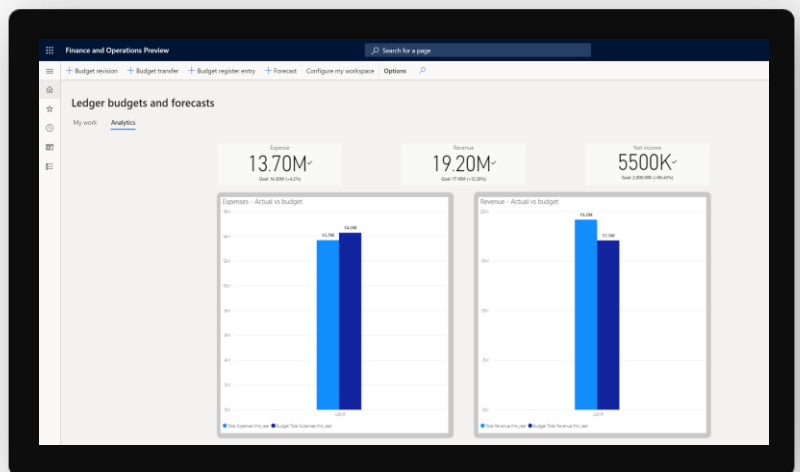

Process and productivity

Get more done with customizable workspaces, Office 365 integrations, and intelligent tools that help you prioritize and automate tasks. Use predictive insights and automation to effectively manage credit and collections processes, close books faster and simplify global financial management with in-depth reporting capabilities, financial intelligence and embedded real-time analytics.

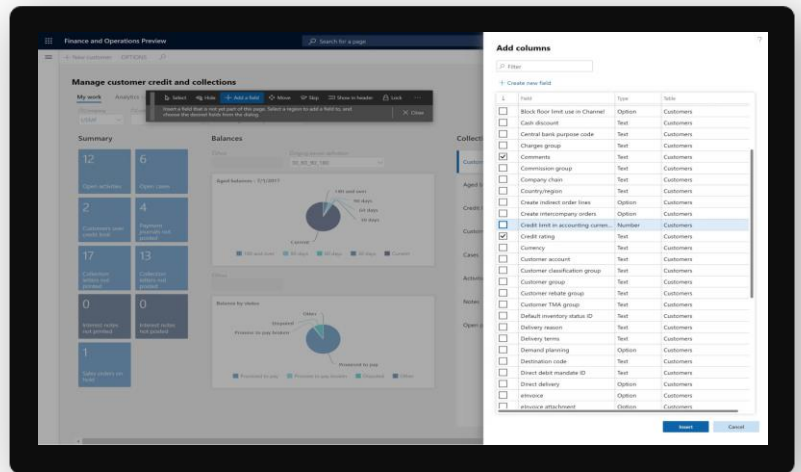

Performance and growth

Increase profitability and cash flow with predictive recommendations and proactive guidance for timely customer payments. Increase efficiency across the business with financial process automation, budget control and financial planning tools; and expand faster—whether optimizing across subsidiaries, acquiring companies, or growing organically — with rapid deployment across 42 countries/regions and 47 languages.

Compliance and risk

Leverage credit management tools that minimize risks while delivering flexibility and control for global organizations. Automate revenue forecasting, allocation, recognition, subscriptions, and renewals and reporting through a rule-based event handling process that enables your business to accurately report your financial statements and comply with accounting standards, including IFRS 15 and ASC.

Why Microsoft?

Roll out a powerful ERP application to get real-time information on almost any device, at any time. Leverage unmatched rapid and scalable deployment options that offer you the best of both worlds (cloud and on-premises) to meet today's global business requirements and have the flexibility to adapt with ease as your business needs evolve. Simplify and accelerate business process changes, seamlessly integrate with legacy systems and scale globally at your own pace.

Dynamics 365

Align operations across your business empowering you to deliver impact today while you innovate for the future. Get the intelligence, flexibility and agility you need to achieve exceptional results.
