# Meet The FigBytes Sustainability Platform

THE RESPONSIBILITIES of sustainability leaders have never been more critical, visible, or complicated. As you face new requirements and pressure from a growing pool of stakeholders, implementing the right technology to support your sustainability program is the smart way to streamline reporting, increase transparency, and ensure success.

Our comprehensive software transforms complex environmental, social, and governance information into simple reporting and actionable insights by capturing data in a central, secure, cloud-based platform that manages strategy, automates framework reporting, and simplifies stakeholder engagement, for climate, water, and beyond.

*FigBytes empowers impact-focused organizations to make positive change for people and the planet.*

# THE ALL-IN-ONE SUSTAINABILITY MANAGEMENT PLATFORM

Simplify sustainability and be ready  
for evolving regulations with a  
single software.

Whether you're tackling one  
sustainability challenge or many,  
our solutions are built on a single,  
scalable platform so your technology  
investment will grow with your program.

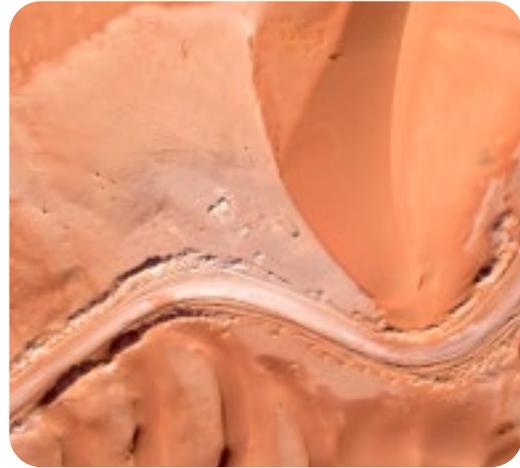

# Our Platform Solutions

The FigBytes Solutions are built on operational data, practical workflows, transparent controls, and enhanced by machine learning to support the full spectrum of sustainability goals.

**Climate Accounting** - Establish a credible GHG inventory and reduce your climate disclosure and framework reporting burden.

**Climate Action** - Set, manage, and achieve SBTi-aligned or custom emission reduction and net zero goals, leveraging scenario analysis and live reporting tools.

**Scope 3** - Reduce risk and engage suppliers with a central portal that streamlines data capture, benchmarking, and communication to create a more transparent and sustainable value chain.

**Water Stewardship** - Move beyond consumption to determine water footprints and understand overall water risks, impacts, and opportunities.

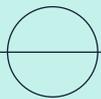

**ESG Insights** - Manage every metric that is material to your sustainability program with a single hub for environmental, social, and governance management, including DEI, CSR, supplier, industry, and custom metrics.

# Our Platform Technology

Best-in-class data management and beyond.

Your program doesn't stop with data collection, so why should your software? The FigBytes Sustainability Platform offers the most comprehensive software for impact-focused organizations. Collect, centralize, and calculate all your sustainability data in one platform for real insights you can use, track, and share.

## Data Management

Streamline data capture and calculations across your operations with APIs and IoT integrations, custom surveys and forms, built-in emission factor libraries, & audit-ready tracking.

## Analytics and Reporting

Automate progress reporting and leverage machine learning scenario analysis for accurate benchmarking, improved predictions, and better program outcomes.

## Strategy Management

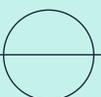

Bring your strategy to life with interactive strategy maps, integrated scorecards, and coordinated materiality assessments.

## Stakeholder Engagement

Share your progress with stakeholders in real-time with custom dashboards, live microsites, and app integrations like Microsoft Teams and Slack.

# More Built-In Frameworks for Reporting Ease

---

# Secure, Scalable, & Supported

Arm yourself with a proven partner and advanced technology on your mission to improve impacts and change the world.

## **Purpose-Built & Fully Secure**

Unlike systems applying out-of-date technology to today's challenges, FigBytes was designed to address the complex and ever-changing sustainability landscape. The secure and fully auditable SaaS platform doesn't rely on fragmented software or complicated back-end integrations and delivers a unified experience to every user in your program. ISO 27001 and GDPR certified and SOC 2 Type 2 compliant.

## **Comprehensive & Scalable**

FigBytes is a comprehensive yet modular platform that is designed to grow with your sustainability program. While carbon is top of mind for many organizations today, our future-focused software is ready to tackle emerging challenges and disclosure requirements on the Environmental, Social, and Governance horizon.

## **Better Together**

We believe that making positive change for our communities and planet is possible, and that the best time to start is today. The FigBytes Sustainability Platform comes with the full backing of a team of ESG and technology experts, from demo to implementation, training to support, and beyond.
