

WINDOWS AS A SERVICE

Optimize Efficiency. Increase Security. Improve Collaboration.

Windows as a Service is a way to build, deploy and service Windows 10/11 operating systems in your organization, enabling your IT professionals to maintain a consistent Windows 10/11 experience for users. The benefits of Windows as a Service are compelling and include:

SECURITY

Continual Windows 10/11 improvements allow you to stay ahead of attackers, keeping devices secure and aligned.

PRODUCTIVITY

New features are added regularly, providing value and improving productivity with minimal end user disruption.

DEVICES

Hardware is changing rapidly, which affects integration, performance and battery life. Software is a key piece of improving power management, performance & leveraging new hardware features.

JOURNEY TO WINDOWS 10/11 & OFFICE 365 PROPLUS

The journey to Windows 10/11 & Office 365 ProPlus is broken into 4 proven phases for efficiency, reliability and cost savings.

PHASE I - APPLICATION & HARDWARE READINESS AND ASSESSMENT

- Application Discovery
- Application Rationalization
- HW Readiness (Configuration Manager version, Health check, Windows 10/11 Compatibility Assessment)
- Endpoint Analytics

PHASE II - IMAGE & MICROSOFT ENDPOINT MANAGER BUILD AND/OR INTUNE

- Image Build (Upgrade Analytics)
- Intro to cyclical model for Operations Options and Architecture build to include:
 - Image, driver, and patch management; application testing and service/deployment rings
 - Office 365 ProPlus implementation; Configuration Manager upgrade
 - Intune Deployment or Co-management with Configuration Manager

PHASE III - APPLICATION TESTING AND CERTIFICATION FOR WINDOWS 10 UPGRADE

- Deployment Validation of Corporate Image
- Launch test/UAT functional testing, repackaging and upgrading applications

PHASE IV - DEPLOYMENT

- In-place Upgrade, and/or wipe and load deployment to service rings
- New Hardware Deployment (bare metal imaging)

BETTER INSIGHTS WITH ENDPOINT ANALYTICS

Having access to the right data when it is presented in the right way can help you save time, reduce costs and avoid unnecessary headaches. Endpoint Analytics gives you just that. Better yet - we will do the work for you and present it in our regular status reports.

UPGRADE READINESS

Plan upgrades by identifying devices that are ready and identify & resolve top app/driver compatibility blockers.

UPDATE COMPLIANCE

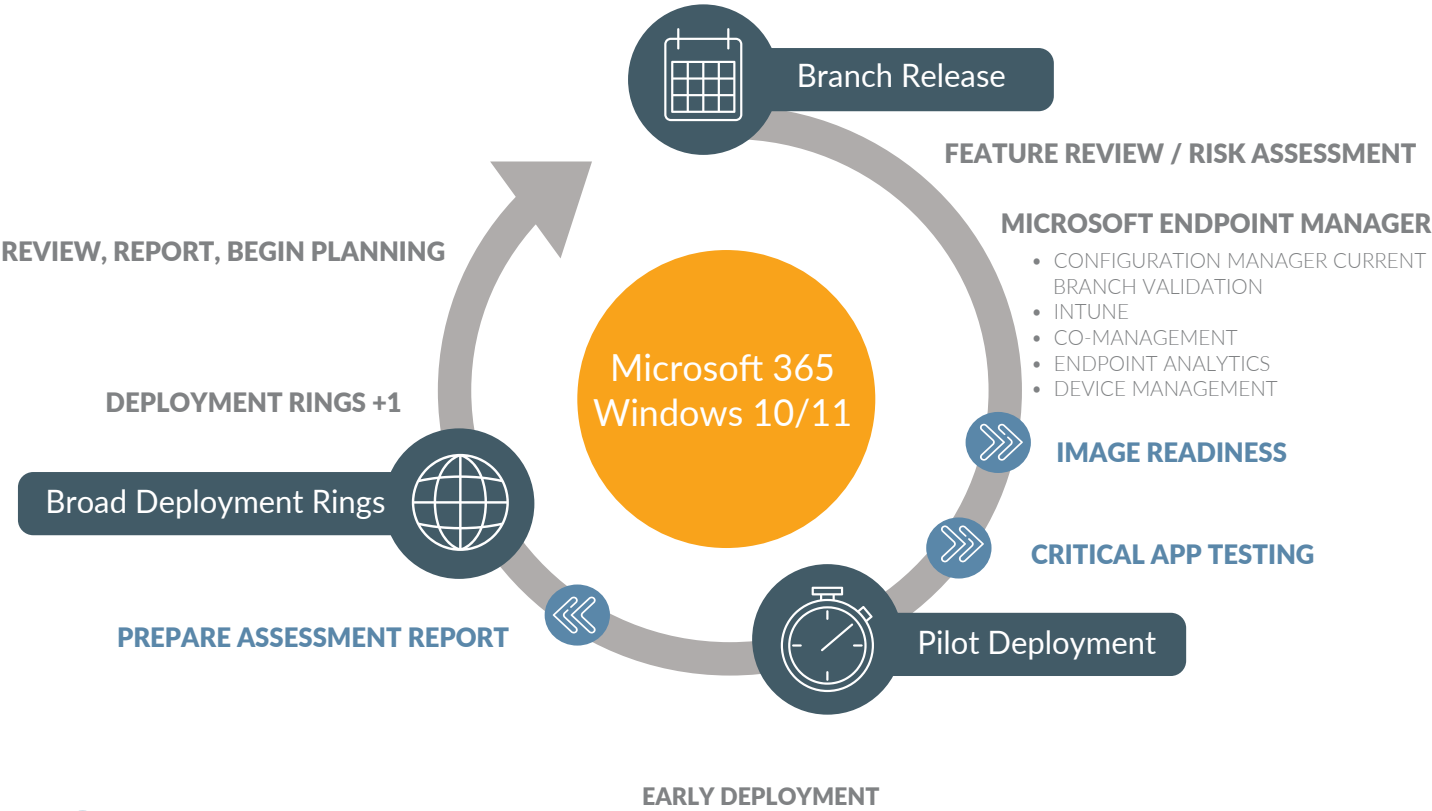

Ensure update and antimalware compliance with timely reports for all your devices (even those on the road).

DEVICE HEALTH

Reduce support costs by proactively identifying and remediating top end-user issues.

MODERN DEVICE MANAGEMENT LIFECYCLE

PRICING MADE EASY

We have streamlined our processes and tools and have a team of Modern Endpoint experts. You can take advantage of your modern device investments through our simple per device, per month pricing. No surprises, no hidden fees. Contact AMTRA to learn more about pricing for Windows as a Service for your organization.
