

# Accelerate Windows 365

## Innovative Endpoint Management Capabilities for your Environment

Modern Endpoint Management enables your employees to work from virtually anywhere, safely and securely - giving users the devices they want and the tools and technology they need to get the job done. Customers are solving end-user computing challenges differently in recent years, and companies are investing in new and emerging technologies that enable them to deploy, manage and secure new endpoints.

Accelerate Windows 365 combines our Next-Gen Endpoint Workshop and Accelerate Windows 365 POC into an exclusive opportunity for our customers which offers innovative management capabilities for your environment and optimizes your existing investment in cloud solutions.

### Next-Gen Endpoint Workshop

**Design and Plan**

**Customer Value Conversation**

**Discovery Session for Endpoints**

**Results and Recommendations**

The first stage of your next-gen endpoint journey is a cloud accelerator workshop which focuses on the priorities and key influences in your hybrid work environment and end-user computing strategy.

We teach you ways to drive endpoint modernization with Windows 11 and Windows 365 and work together to showcase Cloud PC provisioning & management with Windows 365 in a production environment.

This workshop is customized based on your needs.

### Accelerate Windows 365 POC

**Prepare your Environment**

**Design W365 Architecture**

**Deploy W365 Securely**

Next, AMTRA will transition into our Accelerate Windows 365 proof of concept where you will discover ways to solve some of the challenges faced by the next generation of endpoints.

From information workers, frontline workers and temporary workers, we have innovative solutions to meet your hybrid working challenges with Windows 365.

Recognize when and how to **leverage** Cloud PCs and **Windows 365**.

Learn how to **manage virtual endpoints** across W365 and Azure Virtual Desktop.

Design a **secure desktop** experience that can be accessed from virtually anywhere.

Deploy **Cloud PC** to enable hybrid work for all employees.
