Microsoft Viva Value Mapping

Our Viva Value Mapping service helps you understand the benefits of Microsoft Viva and demonstrates how to leverage the four Viva modules within your environment to enhance employee experience and increase engagement. This 6-week Proof of Concept engagement gives you a risk-free taster of Microsoft Viva before you commit to a full implementation. Viva is a game changer, and we're sure you'll see the business benefits, but we recognize its still early days for this new employee experience platform, so why not try before you buy!

Why AMTRA?

People are at the forefront of everything we do so we're really excited about Microsoft Viva. Our Technical Architects join forces with Adoption & Change Management to deliver the technical expertise, communication and training your team needs to thrive with Viva.

Get started today with **our 6-week Viva Value Mapping** service to get a taste of what Viva can do!

Viva Connections facilitates easy access to internal communications and the company resources employees need.

Viva Insights provides personalized insights to your employees about their individual working patterns and experiences.

Viva Topics provides AI-powered knowledge discovery assistance, connecting info and experts across your organization.

Viva Learning makes training and professional development opportunities more discoverable and accessible to employees.

AMTRA's Approach & Deliverables

Phase 1
Discovery Workshops

- Gather pain points and challenges in current environment
- Identify opportunities and use cases for Viva modules:
  - o Viva Connections
  - o Viva Insights
  - o Viva Topics
  - o Viva Learning

Phase 2
Planning, Ideation & Design

- Prioritize use cases identified in discovery
- Plan & design prototypes for Viva module deployment
- Determine pilot user groups
- Develop ACM plan to train user groups on Viva

Phase 3
Deployment & Training

- Build prototype & deploy to identified user group
- Deploy ACM training modules to end users
- Gather usage reports & feedback from pilot users
- Deliver final report including roadmap for broader deployment
