

AMTRA MANAGED DESKTOP

Secure and Manage all your Devices

Take strategic control of your modernization journey with end-to-end device management and security monitoring. Keep everyone secure, productive and up to date, while you focus on your organization's digital transformation.

MICROSOFT END POINT MANAGER WITH INTUNE

Enjoy Fully Managed Support

At AMTRA, our primary focus is to ensure your organization's devices are reliable and secure. Intune, a cloud-based service focuses on delivering the latest versions of Windows 10 and Microsoft 365 Apps for enterprise apps.

Our Intune Managed Services Program will assist your organization with onboarding, device management, software management, policy management and compliance reporting.

HIGHLIGHTS

- ✓ Increased IT productivity.
- ✓ Direct to end-user delivery.
- ✓ Quick boot times, that leads to enhanced end user satisfaction.
- ✓ Increased use of workstation investments.
- ✓ Time for IT to focus on higher value work, like policy creation.

LEVERAGE WINDOWS AUTOPILOT

Windows Autopilot simplifies the enrolment of devices in Intune. You can build and maintain customized operating system images and apply these custom images to new devices to prepare them for use, before giving them to end users.

When you use Intune to manage Autopilot devices, you can manage policies, profiles and apps after they're enrolled.

VALUE ADDS

Device Management

We will manage all of your devices.

Maintain Compliance

We will collaborate with you to define compliance requirements & policies.

Enhanced Protection

We can safely procure and secure hardware.

SOLUTION OFFERING

This engagement provides the services for a modern device management architecture design and device implementation. These services include Microsoft Intune Design and Build, as well as Managed Services.

Microsoft Intune Design and Build

- Conduct a workshop session to discuss Intune design, including:
 - Azure Active Directory Integration
 - Deployment Scenario
 - Windows Updating Policies
 - Windows Defender configured via Intune
 - Office Pro Plus deployment via Intune
 - Edge Chromium deployment via Intune
- Design a Microsoft Intune management solution hosted in Microsoft Azure using best practices.
- Configure policies and compliance to support your requirements.
- Provide remote support for issues related to Windows 10 and Microsoft Intune during the proof of concept.
- Incorporate changes to the Intune deployment.

Managed Services

- Monthly health checks on device configurations
- Updated device configurations every six (6) months following Windows 10 feature rollout
- Monthly compliance checks
- Import of hardware Ids

Typical Length of Engagement

- 2 – 3 weeks
