Service Background

Cloud computing is transforming businesses all over the world. Migrating to the cloud has the power to change every aspect of your operations, and analytics is not an exception.

SAS® Viya® is a data analytics platform built with the cloud in mind. It is designed to be elastic, dynamic, and fault-tolerant, addressing the increasing analytical demands of today but able to rise to tomorrow's challenges. If you're planning to make the move to the cloud, be future-ready and don't leave your data analytics behind.

SAS® Viya® Deployment Services

Moving to the cloud from a legacy system can be tricky. There is no one-size-fits-all solution. However, after years of successful migration projects, MySASteam has got it down to a science. We'll pave your road to success.

MySASteam helps you migrate to Viya® on your own terms and ensures that nothing is left behind. We help you make the move from SAS® 9 to Viya® as painless as possible.

As part of our migration services, we can help you to:

- Design a cloud technology stack tailored to your organisation;
- Secure necessary licenses for components of your cloud solution;
- Create a thorough migration plan to ensure that nothing is left behind;
- Augment your workforce with the skillsets needed for the migration;
- Optimise legacy applications with new technologies;
- Prepare your team for the transition from a full-featured legacy to a subscription-based version of your system.

Contact us today for your **free** 1 hour consultation on our SAS® Viya® Deployment services.
