Migration of on-prem data environment (SSIS/SSRS/SQL Server) to Azure (ADF/Power BI/SQL MI)

Our Data Analytics Service Offerings

Fully Managed ETL/ELT

- Integrate your cloud data with on-premises data efficiently. Leverage our cloud-based ETL and data integration service to build workflows for transferring and converting data.

Lakehouse for Analytics

- Our experts' remarkable professionalism and experience ensure you a practical, perfectly integrated, secure, and effective Azure Databricks platform.

AI/ML and Advanced Analytics

- Our certified developers provide fast, economical Power BI upgrades. Using the installer, we ensure a smooth upgrade with minimal downtime and disruptions.

Scalable Managed Database

- We analyze your BI requirements, data sources and plan deployment architecture and, build processes for ETL, data quality validation and automate processes to load reporting data on an ongoing basis.

Modern Cloud Data Warehouse

- Our developers re-arrange and resize visuals for an optimal mobile experience, create responsive visuals, add and remove visuals from the layout to best fit your mobile layout.

Actionable Business Intelligence

- We provide data extraction, cleansing, and data preparation services, create apps that integrate with a Power BI dashboard in real-time, and integrate Power BI tiles and reports into apps.

Our BI Service Offerings

Custom Power BI Dashboards

- Our developers use your organization reporting data warehouse, data models, and user-centric Power BI dashboards to create high-quality custom dashboards and streaming tiles using Azure

Seamless Implementation and Roll-Out

- Our Microsoft experts deploy and configure the Power BI solution and migrate your organizations' data from your legacy system to the new Power BI platform.

Power BI Upgrades

- Our certified developers provide fast, economical Power BI upgrades. Using the installer, we ensure a smooth upgrade with minimal downtime and disruptions.

Data Analysis Automation

- We analyze your BI requirements, data sources and plan deployment architecture and, build processes for ETL, data quality validation and automate processes to load reporting data on an ongoing basis.

Mobile Visualizations

- Our developers re-arrange and resize visuals for an optimal mobile experience, create responsive visuals, add and remove visuals from the layout to best fit your mobile layout.

Data Integration Development

- We provide data extraction, cleansing, and data preparation services, create apps that integrate with a Power BI dashboard in real-time, and integrate Power BI tiles and reports into apps.

Data Platform Modernization – Overall Approach

Pre Transformation

Discover & Assess

Discover current data platform
Gain insights on current system dependencies
Assess readiness to modernize and identify gaps
Cost, compatibility analysis wrt target environments

Discover Resources and Assets

Source/Target Systems
Databases and sizes
Scheduler Jobs
SSIS, SPs and SSRS
ETL and replications

Learn Usage and Dependencies

System Integrations
Performance challenges
SLA adherence
Scalability
Dependencies

Cloud Readiness & Modernization

Cloud Service Provider
Migration Approaches
Compatibility Checks
Optimizations
Cost Savings

Feasibility & Gap Analysis

Roadmaps
Pilots Required
Phased Implementations
Cut Over Plans
Future State
