Connectivity Check Navigator

ANS

Think Bigger.

What is the Connectivity Check Navigator?

The ANS Connectivity Check Navigator will help you overcome the complexities of modernising your connectivity architecture whilst simplifying the management and improving the visibility of traffic. By looking at your current state vs desired future state, we can help you define and build your connectivity strategy to help unlock the potential of modern connectivity architectures and increase its value to your organisation.

Who's it suitable for?

This Navigator is ideal for organisations who are:

- ✓ Looking to move from on-premises to cloud

- ✓ Moving to internet-first connectivity

- ✓ Planning to utilise more SaaS based services like Office 365

- ✓ Changing current connectivity from a traditional to modern SD-WAN service

What's an ANS Navigator?

Navigators are complimentary engagements that provide you with the resources and information to be able to realise your long-term strategic vision and steer your digital transformation journey.

What Outcomes Should you Expect?

In around 2 weeks, we will have compiled our review of your network efficiency, architecture, security and operating model. We'll provide you with an unbiased and external view of how you are using your connectivity today, how you want to connect your sites and people tomorrow and how to bridge the gap to enable you to achieve that goal.

We'll compile all the information and present this back to you. We'll tell you where your network is great, or if you can make improvements.

A Business case

Get a full, board-ready business case covering the TCO, ROI and full benefits breakdown for your organisation.

Future operating model

We'll review the current team with regards to managing and operating a modern connectivity service. If you require a Co-Managed approach, we can help you build a CoE to optimise the operating model.

Commercial model

We'll provide you with a commercial model that meets your CAPEX and OPEX requirements and helps you understand the costs of the future state vs current state.

Transformation plan

You'll receive a roadmap that shows you how to modernise your network.

Why use an ANS Navigator?

Rapid time to value

It typically takes 4-6 weeks to complete this Navigator and usually only requires around 10 hours of your time spread over those weeks.

Board-ready outputs

We will provide you with board-ready outputs, a strategy document, business case and presentation.
