Cloud Check.

What is Cloud Check?

The Cloud Check is designed to help you optimise your cloud environment. Public cloud unlocks agility, scalability and innovation - but it can also introduce unforeseen challenges. If you're worried about security, don't have full visibility of governance, or your cloud consumption is creeping up unexpectedly, it's time to take control. This Cloud Check provides a detailed review of your environment and a clear set of recommendations to help you reduce costs, improve security posture, and align to cloud best practice standards.

Is a Cloud Check right for you?

It's ideal if your organisation has:

- Recently completed a data centre migration to cloud.
- Experienced significant or noticeable month on month consumption increases.
- Poor operational capabilities.
- Poor insight into your cloud governance and/or security posture.
- Experienced staffing changes, resulting in a loss of skills or knowledge on platform operations.

Need reassurance that the platform you're using is fit for purpose and meets the needs of your business.

What outcomes can you expect?

We will provide you with a comprehensive analysis of your current cloud environment, covering four key areas:

01

Cloud Consumption and Cost Optimisation
We'll review your automation, scaling and resource provisioning to ensure optimal cost efficiency. You'll also receive tactical recommendations to help you make immediate savings.

02

Governance and Security Posture
We'll validate governance controls and configuration policies to ensure your platform meets required security and compliance standards.

03

Operational Efficiency
We'll identify opportunities for modernisation, automation or orchestration to reduce operational overhead and increase performance.

04

Architecture Best Practice
Your environment will be assessed against vendor best practices for architecture, configuration, and integration

Why use an ANS Cloud Check?

Rapid Time to Value
Delivered in just 4–6 weeks, requiring around 10 hours of your time across the engagement.

Board-ready Outputs
Receive a full strategy document, business case and executive ready presentation.

Actionable Insights
Get clear, prioritised recommendations based on the health and maturity of your current cloud estate.

A Defined Operating Model
Moving to cloud is only the first step. We help you define what comes next — capability building, training, ongoing support, or operational uplift.
