

Co-Managed Security.

Think Bigger. Get AI-Ready. Become Frontier First.

ANS Co-Managed Security is a collaborative operating model that combines your strategic control with our operational expertise. We help you reduce exposure, strengthen governance, and improve resilience across identity, endpoint, cloud, and data — while easing the operational burden on your in-house team.

Today's Challenge

43% of UK organisations experienced a cyber breach or attack in the past 12 months.

£3.29 million is the average cost of a cyber breach in the UK.

Over 54% of UK security leaders report a lack of in-house security capacity and capability.

What Is ANS Co-Managed Security?

An end-to-end, Microsoft native security service built to strengthen posture, reduce risk and improve cyber resiliency. With expert oversight, continuous monitoring, and structured change control, you can move faster, stay protected, and prepare your organisation for AI with confidence.

Business Outcomes

- ✓ **Cyber resilience without compromise**
Minimise downtime with proactive controls, rapid detection, and expert response.
- ✓ **Security expertise on demand**
Extend in-house capability with specialist guidance, governance, and Microsoft-aligned best practice.
- ✓ **Compliance without complexity**
Simplify policy management, reporting, and audit readiness.
- ✓ **AI-ready foundations**
Support safe adoption of Copilot and AI through stronger controls, visibility, and governance.
- ✓ **Reduced risk and operational strain**
Strengthen protection while easing pressure on internal teams.

Why ANS?

UK-based 24x7 security expertise

Always-on support from specialists who understand your environment and your priorities.

Secure by design, secure by default

Security, governance, and policy control are built in from the outset.

Top-tier Microsoft security credentials

Recognised across security, identity, threat protection, and data security.

Continuous improvement

Ongoing posture management, reporting, and expert guidance to help your security maturity evolve.

End-to-end security approach

From proactive prevention that reduces risk and attack surface to ongoing threat detection and incident response that minimises impact.

Trusted foundation for AI

Strengthen control, reduce risk, and build the governance needed for secure AI adoption.

Get Started with a Security Navigator.

Begin your journey with ANS Security Navigator — an expert-led engagement designed to:

- Assess your current security posture
- Identify gaps and risks
- Deliver a practical roadmap for improvement.
