

Co-managed Data Platforms & Centre of Excellence

ANS

Think Bigger.

Co-Managed Data Platforms.

The Managed Data Platform service will provide you with the capability and functionality to support a modern data platform in the cloud, specifically focused on your data warehousing requirements, architecture design governance and future integration requirements.

It supports the full lifecycle of a modern data platform and will ensure it's always running at optimal performance to give you the analytics power to gain a competitive advantage.

Co-managed Data Platforms operates across 5 key domains:

- 01** Expert access
- 02** Data operations
- 03** Efficiency Management
- 04** Security and governance
- 05** Centre of Excellence

This service will enable you to:

Access technical support

Gain technical support across architecture guidance and design validation.

Get full ETL monitoring

The service supports all Azure data services, bespoke usage reporting and triaging and remediating broken data pipelines.

Reduce TCO

Reduce TCO by ensuring resources are right sized and are being used in a cost-efficient way.

Ensure auditability

Ensure everything is auditable, all logs are aggregated, tagging is enforced and RBAC is configured as required.

Managed Data Platform Centre of Excellence (CoE)

ANS' Data Platform CoE gives you the ability to tap into a rich pool of data skills and resources as and when you need them, without the burden of having to build your own in-house capability.

ANS will provide Architecture Validation, Change Management and Provisioning Support for the following:

- ✓ Native ETL tooling
- ✓ Native data services
- ✓ Analytics & Machine Learning services
- ✓ Visualisation services

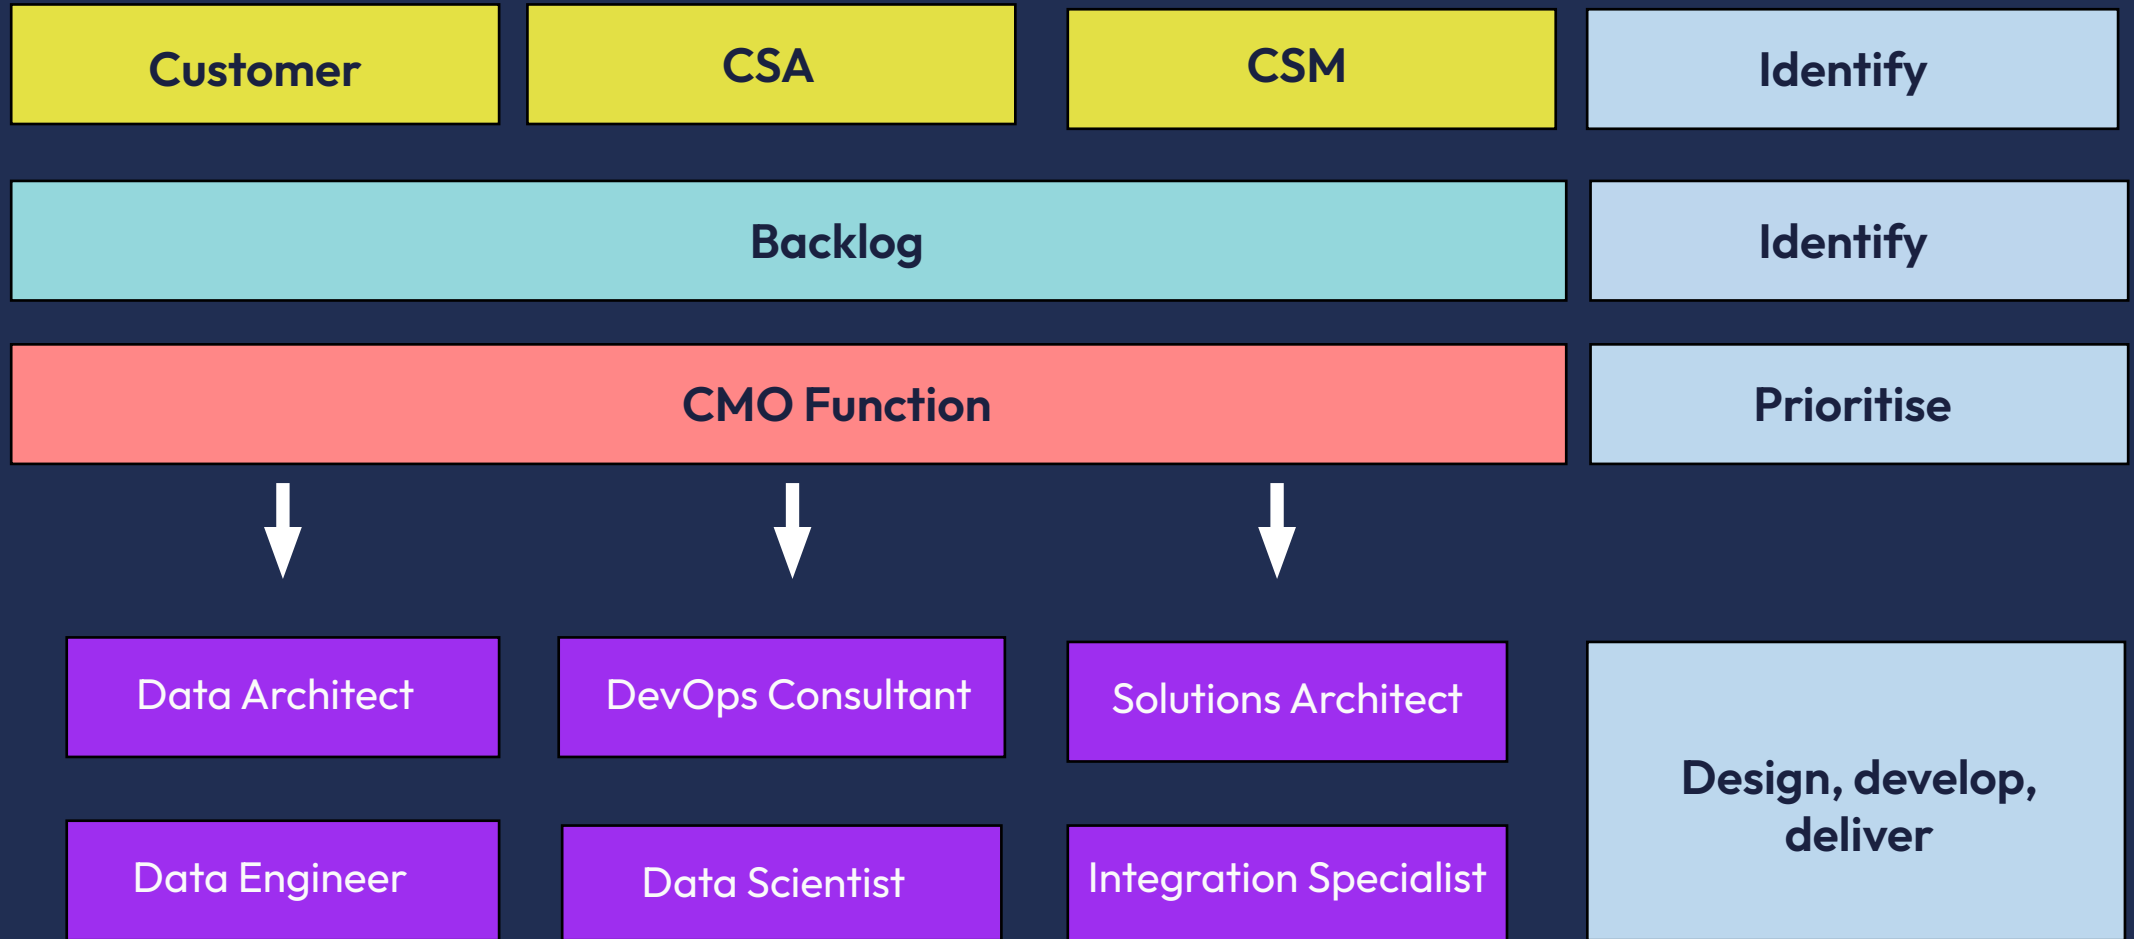

We use advanced Azure PaaS Services meaning we can provision the latest Modern Data Architecture to suit your business requirements.

What is a CoE?

A CoE is a centralised unit of dedicated people who streamline access to scarce, high-demand capabilities for rapid execution across the business. The CoE hones expertise in a specific subject area and standardises best practices for wide-scale adoption.
