

Power BI Accelerator

ANS

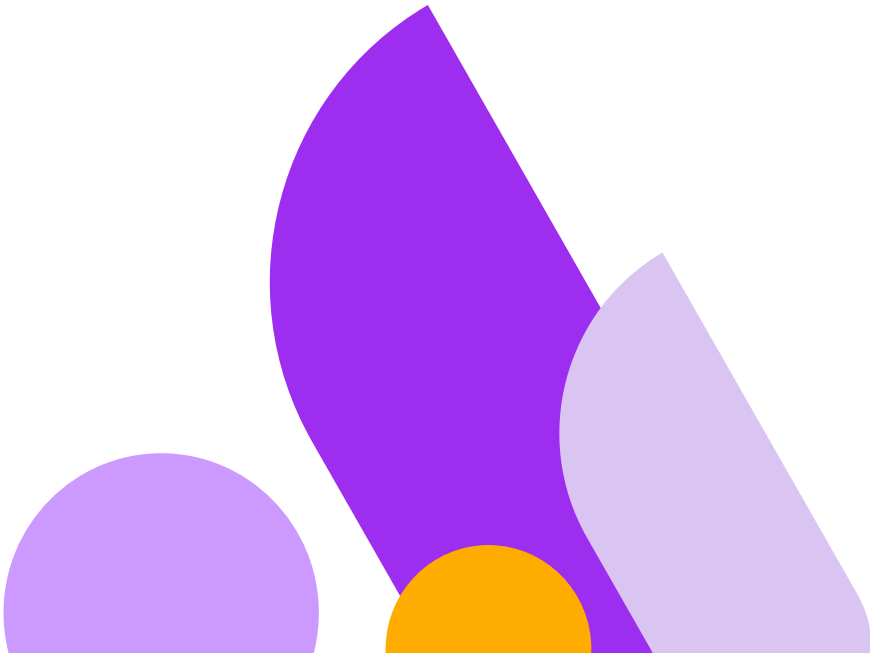

Think Bigger.

What are ANS Accelerators?

Our Accelerators are high-value, low-cost solutions which can be delivered in less than 6 weeks, making them ideal if you're on a tight deadline or don't want to make a significant investment.

What is the Power BI Accelerator?

The Power BI Accelerator will help you turn data into insightful information that will enable you to make proactive and informed business decisions. This Accelerator is focused on Microsoft's Power BI platform and will provide you with interactive and operation-ready reporting that can be tailored to your data sources, objectives and your KPIs.

Who is this suitable for?

This Accelerator is ideal for organisations that have a data driven initiative and have a desire to improve reporting and business intelligence. It's also suitable for organisations that are data rich, but insight poor, have a legacy data BI capability or have a limited or growing data function.

What will this solution enable me to do?

1. Visualise your data

Bring your data to life by displaying it in a variety of charts and diagrams to easily understand, gain and share insights.

2. Develop & harness a data-driven culture

Allow your technical employees to serve data and non-technical teams to easily interpret it.

3. Protect sensitive information

From sensitivity labels to row level security, multiple security features will enable you to protect sensitive information and meet security and compliance standards.

4. Import data from a variety of sources

Import data from Oracle, SAP and Snowflake to online data sources like Salesforce and Adobe Analytics.

5. Make intelligent Predictions

With AI built in, you can dive deep into your data to generate insights, identify trends & spot patterns in data and use those patterns to make informed predictions and run "what if" scenarios.

How do ANS deliver this Accelerator?

Delivered using a standardised statement of work, build process and engagement means we can get you up and running with a fully functioning interactive Power BI report Using our mature remote delivery capability, we can ensure a quality build from our UK-based 24x7x365 operations centre, without requiring significant input from you.

What outcomes can I expect?

We will deliver a fully functioning interactive Power BI report ready for data to be ingested and served. This can either be for a bespoke assignment or proof of value that can be adopted at an enterprise scale.

What are the benefits of using an ANS Accelerator?

Rapid time to value

Depending upon if a landing zone is required, ANS can deliver this accelerator within 2-6 weeks.

Solution documentation

We will document and record all solution steps and components to provide you with a detailed summary of the report's data sources, respective transformations, modelling, and any in built measures.

A defined data model

We'll ensuring all relationships are in place between the required data sources to enable you to access the insights from your data in an output you can trust and understand.

High-touch project support

A dedicated Project Manager and short project kick off lead times will get your project off the ground quickly and smoothly
