

Power Platform Landing Zone Accelerator.

ANS

Think Bigger.

What is the Power Platform Landing Zone?

The ANS Power Platform Landing Zone Accelerator will enable you to quickly deploy best practice aligned guardrails into your Power Platform estate to prevent your users from accidentally, or intentionally leaking business data outside of your organisation, potentially leading to data loss and breach of regulatory compliance.

Power Platform presents a unique opportunity for your organisation to centralise your data and store it in a controlled, governed manner. By default, power platform ecosystems are enabled for every organisation purchasing Microsoft 365, Power Apps or Dynamics 365 Licences. As such, it's imperative that you have the appropriate baselines in place to act as a set of guardrails for your users.

What's an Accelerator?

ANS Accelerators are high-value, low-cost solutions which can be delivered rapidly, making them ideal if you're on a tight deadline.

Key Features

1. Best practice guidelines are applied to the default environment and tenant.
2. Recommended baseline DLP policies are deployed and applied.
3. Power Platform and Dynamics 365 environments are created in line with best practice guidance.
4. Where appropriate, Dynamics 365 Apps are automatically deployed into the environments, ready to start your project
5. Power Platform pipelines are enabled by default allowing you to take advantage of practice Application Lifecycle Management processes.

Who's it recommended for?

We highly recommend deploying this accelerator to any organisation with Power Apps, Dynamics 365 or Microsoft 365 to ensure best practice guardrails are in place to prevent data loss and data breaches.

What is and isn't included?

ANS will use automation to deploy a templated landing zone in just 24 hours*.

Please note that this Accelerator DOES NOT include any professional services time to configure and customise the Landing zone or build solutions on top of the platform.

*To enable us to deploy the landing zone within 24 hours, you will be required to have the appropriate Power Platform or Dynamics licencing and supporting pre-requisites in place prior to deployment.

The Benefits

Rapid Deployment

Rapid deployment of default baselines in just 24 hours to secure your Power Platform ecosystem.

Templated Architecture

Templated architecture aligned to Cloud Adoption Framework principles.

Pre-defined Baseline

Avoid lengthy consulting time to agree a baseline - we have it pre-defined.

A Solid Foundation

Establish a solid foundation which can be built on and tweaked using the ANS Professional Services team following deployment.
