ANS

6 WEEKS

ANS Microsoft Threat Protection Workshop

Automated and rapid deployment is available with predefined deployment options. This approach is ideal for proof of concepts (POCs) of Sentinel and Defender XDR, while the Modern SecOps Workshop is better suited for onboarding Managed Detection and Response (MDR). Funding is available, subject to full deployment.

Trial licenses are also available. Additionally, new Sentinel deployments can benefit from free Sentinel ingestion for 30 days. Finally, the Attack Simulator can be demonstrated.

Outputs

Microsoft Defender Portal
- Microsoft Defender XDR

Cloud Identity Protection
- Microsoft Entra ID Protection
- Microsoft Entra Conditional Access

Unified SecOps Platform
- Microsoft Sentinel
- Defender XDR Connector
- Windows Security Events

Email Protection
- Microsoft Defender for Office 365
- Attack Simulator POC

Endpoint and Cloud Apps Protection
- Microsoft Defender for Endpoint
- Microsoft Defender Vulnerability Management
- Microsoft Defender for Cloud Apps

***all these modules need to be deployed.**

Benefits

You'll benefit from:

- **Wider overview of the Defender XDR capabilities**
- **Trial licensees for Microsoft Defender XDR**
- **Free 30 days data ingestion (for new Sentinel implementations)**
- **Fully working Sentinel deployed in your tenant**
- **Easy transition to ANS MDR service at a later date**
