

# Microsoft XDR Accelerator

Think Bigger.

## What are ANS Accelerator?

Our Accelerators are high-value, low-cost solutions which can be delivered in less than 6 weeks, making them ideal if you're on a tight deadline or don't want to make a significant investment.

## What is the Microsoft XDR Accelerator?

The Microsoft XDR Accelerator will help you understand the interoperability and technical capabilities of M365 Defender, Defender for Cloud and Microsoft Sentinel. This Accelerator is focused on the Microsoft security technology and best practice architecture, creating the foundation for you to fully adopt a true and modern XDR process around your endpoints and workloads, along with a cloud-based SIEM and SOAR platform at scale.

## Who is this suitable for?

This Accelerator is ideal for organisations who:

- Are low on the security maturity scale
- Have a modern security operations initiative
- Don't have a SOC or have legacy security tooling in place
- Are migrating to cloud and digital platforms
- Lack skilled security resource
- Want to evaluate the technology or deliver a PoC

## What will this solution enable me to do?

- Achieve security best practice – this Accelerator will ensure best practice is achieved across security, architecture and governance, providing full visibility end-to-end across the Microsoft XDR platform.
- Adopt a true and modern XDR process - create the foundation for you to fully adopt a true and modern XDR process around your endpoints, workloads along with a cloud based SIEM and SOAR platform at scale
- Start ingesting and serving security alerts – benefit from a fully functional Microsoft XDR platform, built to best practice so you can ingest and serve security alerts and incidents within Microsoft Sentinel.

## What outcomes can I expect?

Once your Accelerator has been deployed, you will have a fully functioning Microsoft XDR platform built to best practice ready for you to start ingesting and serving security alerts and incidents within the Microsoft Sentinel platform.

This Accelerator ensures best practice is achieved across security, architecture and governance, providing full visibility end-to-end across the Microsoft XDR Platform. The Microsoft XDR Accelerator is designed for organisations who recognise they want to do more with their security endpoint, workloads and security operational tooling and want to work with Microsoft best-in-class security services.

## What are the benefits of using an ANS Accelerator?

- ✓ Time to deliver – Depending on the variant and if a landing zone is required, ANS can deliver this accelerator within 2-6 weeks, with the 6 weeks being the enterprise ready landing zone fully integrated with any existing services.
- ✓ Best-in-class cloud based SIEM & SOAR platform – Microsoft are recognised as a leader by Gartner on their Magic Quadrant for Security Incident & Event Management (SIEM) platform, perfect for replacing legacy SIEM platforms.
- ✓ Fast-developing roadmap – Organisations that are investing in Microsoft Sentinel have already seen a significant and continued increase in functionality, usability and growth in end-user communities over the period of their investment.
