Ansi ByteCode LLP, Sanchal Shah, & Microsoft Azure Cloud Migration

Customer challenges :

Migrating a desktop app to the web on Microsoft Azure poses challenges. The client needed to redesign the app for the web, adapt the user experience, and ensure smooth data transfer. Security, scalability, and cost considerations must be addressed. Integrating with Azure services and training users was vital. Client's was focused on preventing issues and minimizing downtime during migration for business continuity.

Partner solution :

ABC began with a smaller team as a trial, & upon confirming their capabilities, we swiftly expanded the team. ABC helped the client by redesigning their desktop app for the web on Microsoft Azure. We made the user experience smooth & moved data securely. Security, handling many users, & cost efficiency were prioritized. The app was integrated with Azure services, & users were trained for the change. Thorough testing was done to avoid issues, & a plan was in place to minimize downtime during the transition for uninterrupted business operations.

Customer benefits :

Our client was benefited as ABC first tested the waters with a small team, ensuring capability. ABC then revamped the client's desktop app for the web on Microsoft Azure, making it user-friendly and secure. Prioritizing security, accommodating many users, & cost-effectiveness, ABC integrated the app with Azure services. Users were trained for the change, thorough testing prevented issues, & a downtime-minimizing plan ensured uninterrupted business operations, leading to an improved & efficient digital experience for the customer.

Client Praises:

"Results are matching our expectations. Project was delivered on time and within budget."

"Hetal & team's PM style and skillset is on par with onshore solution providers."

"What I liked most was the pure professionalism and development ability."
