

STREAMLINE AND SIMPLIFY MICROSOFT TEAMS GOVERNANCE WITH TELLUS

Give your staff the freedom to collaborate and get their job done with the right governance guard rails up

TELLUS IS YOUR CENTRAL HUB TO CREATE, MANAGE AND GOVERN MICROSOFT TEAMS THAT'S INTEGRATED INTO THE FABRIC OF THE TEAMS APP.

Tellus controls the lifecycle of every Team: from creation through to archival or deletion.

Tellus provides a faster, simpler and safer way for your staff to take control of their collaboration using Teams.

Tellus takes care of your governance considerations for you, including cataloguing your Teams with custom metadata.

An automated approval workflow ensures you avoid duplication and Teams sprawl.

Tellus has 4 unique templates that have been engineered to meet the needs of your most common use cases, removing confusion about what tools to use and when to use them.

The Team, channel and tabs are all setup for your staff giving them a running start to collaborate sooner in a structured way.

Each Tellus Team workspace is ready to use immediately. It's automatically configured with the right level of security and compliance to meet the needs of each collaboration use case.

Tellus provides a simple, central dashboard for the day-to-day management of Teams. The personal dashboard is the only place to see all Teams. Security permitting, staff can search for and edit, archive and delete Teams from one place. They'll even be able to restore deleted Teams - something only possible through the 0365 admin portal by Administrators.

WHY DO YOU NEED TELLUS?

Managed well, Teams *is* your modern workplace, but without careful planning Teams can be spiral out of control. The top 3 concerns with Teams we hear from organisations just like yours are as follows:

- 2 How do I manage security, compliance and external access?
- 3 How do I govern existing Teams and understand whether I need to keep them?

Tellus solves the number 1 challenge with Teams: *governance*. Best practice governance is not built into Microsoft Teams. Tellus empowers your staff to collaborate and do their best work whilst providing effective governance at the same time; avoiding significant risks to your organisation.

WHAT MAKES TELLUS GREAT?

- Tellus' templatised approach removes the confusion of what tools to use and when to use them for your staff.
- Tellus provide a configured collaboration Teams space that's ready to use immediately after provisioning.
- Tellus builds in and automatically applies the right level of security and compliance for each Team use case.
- Tellus captures the right metadata so you can manage and understand who owns each Team and why.
- Tellus uses workflow approvals for the creation of new Teams to avoid duplication and Teams sprawl.

- Tellus provides a personalised dashboard to see and search for all Teams in one place, including inactive, archived and deleted Teams.
- Tellus gives both your staff and Teams Admins control and a simple interface to govern.
- Tellus is built into the fabric of the Teams app and is also available through SharePoint.

IS TELLUS NOT EXACTLY WHAT YOU NEED? WE CAN CUSTOMISE TELLUS FOR YOU!

We know every organisation uses Microsoft Teams in their own unique way. If you would like certain features built into Tellus, we can customise your deployment for you.
