

STREAMLINE MICROSOFT TEAMS GOVERNANCE & UNLOCK COLLABORATION WITH TELLUS

Give your staff the freedom to collaborate and get their job done with the right governance guard rails up

TELLUS IS YOUR CENTRAL HUB TO CREATE, MANAGE, GOVERN AND REPORT ON MICROSOFT TEAMS THAT'S INTEGRATED INTO THE FABRIC OF THE TEAMS APP.

Tellus controls the lifecycle of every Team: from creation through to archival or deletion.

Tellus provides a faster, simpler and safer way for your staff to take control of their collaboration using Teams.

Tellus takes care of your governance considerations for you, including cataloguing your Teams with custom metadata.

Your staff have freedom to create Teams and leverage our **askSolution** bot, but an automated approval workflow ensures you avoid duplication and Teams sprawl.

Tellus has 4 unique templates that have been engineered to meet the needs of your most common use cases, removing confusion about what tools to use and when to use them.

Each Tellus Team workspace is ready to use immediately. It's automatically configured with the right level of security and compliance to meet the needs of each collaboration use case.

Tellus provides a simple, central dashboard for the day-to-day management of Teams. The personal dashboard is the only place to see all Teams. Security permitting, staff can search for and edit, archive and delete Teams from one place. They'll even be able to restore deleted Teams - something only possible through the 0365 admin portal by Administrators.

Finally, with **Social Analytics**, you've got access to insights into Teams usage to continually enhance employee engagement.

WHY DO YOU NEED TELLUS?

Managed well, Teams *is* your modern workplace. However, best practice governance is not built into Teams. Without careful planning, an organisation with many users can become impossible to manage, presenting significant risks. The top 3 concerns with Teams we hear from organisations just like yours include:

- 1 How do I manage Teams creation, stop sprawl but empower my staff?
- 2 How do I manage security, compliance and external access?
- **3** How do I govern existing Teams and understand whether I need to keep them?

Tellus alleviates these concerns by:

Removing Confusion

Enhancing Collaboration

ASKSOLUTION ANSWERS QUESTIONS FOR YOUR STAFF INSTANTLY

askSolution is deployed as part of Tellus to your Teams on creation. Immediately, you'll have access to an Al-powered virtual assistant to help you unlock collective knowledge, retain IP and share information instantly.

Q. Search au General Ports Files Whit AskBot Q&A Learning Analytics Aak Analytics +								
Adverg Clang (111 ES4 AM AskBot how to call someone in teams?								
	Answer hover to the person's icon you want to call, and press the "audio call" Answered by: Cuastion Bot Marked as answered by Johnny Chung

What if you could build an organisational brain that retains your IP and frees up your experts to focus on important work? askSolution takes crucial knowledge from your experts and answers questions for your staff from any device, anywhere at any time. It's built to answer topic-filtered questions that's working where your staff are already.

As part of Tellus, askSolution:

- Answers common topic-specific questions instantly
- Reduces your reliance on expensive & time-poor experts
- Facilitates learning and development for all staff
- Available easily from where your staff are already working and collaborating today inside Microsoft Teams
- Democratises your knowledge and IP, enabling all staff to get answers to their most important questions
- Deployed once, available to all Teams for many use cases

Optimising Security

Giving you Control

SOCIAL ANALYTICS PROVIDES INSIGHTS TO UNDERSTAND YOUR PEOPLE

With Social Analytics, you've got access to insights into Teams usage to continually enhance staff engagement and improve collaboration.

Powered by AI, Social Analytics digs deep into your Microsoft Teams interactions to provide real-time insights about how staff are engaging with each other (or otherwise) and talking about your organisation. Discover how staff interact. Uncover your high-performers, key influencers and who's not engaged.

It's is an advanced networking tool that can help you ultimately keep staff engaged – no matter where they work.

As part of Tellus, Social Analytics enables you to:

- Map and enhance employee engagement
- Empower team leaders to assess their performance
- See what's trending in conversations
- Manage change effectively

IS TELLUS NOT EXACTLY WHAT YOU NEED? WE CAN CUSTOMISE TELLUS FOR YOU!

We know every organisation uses Microsoft Teams in their own unique way. If you would like certain features built into Tellus, we can customise your deployment for you.
