

Workspace Booking Manager 365 - Customer Success Story

cersanit

Cersanit is a major producer of bathroom equipment with three factories and more than 1,800 employees. When the COVID-19 quarantine eased, the company was ready to return to the office. However, they needed a solution to ensure employee safety by complying with social distancing rules in an open-plan office with 200 desks. They deployed our solution for desk booking integrated with Microsoft Teams and SharePoint.

Win Results

“Our main requirement was ease of use of the solution. The integration with Teams made that possible,” says Arthur S., Head of IT Infrastructure at Cersanit.
