# DesktopReady
The Modern Desktop as a Service

The way your clients consume technology has changed forever. Companies of all sizes, across all industries are accelerating digital transformation with modern workspaces in the cloud. Most organizations, especially SMBs, are now looking for turnkey solutions that can run with lean or zero in-house IT. Virtual desktops are at the core of this transformation.

Desktop as a Service, or DaaS, is a cloud based virtual desktop infrastructure that enables MSPs to meet comprehensive modern work requirements. This is the time for MSPs to embrace the immense opportunity in this 2.9 billion dollar DaaS market.

DesktopReady for MSP

DesktopReady is a fully functional, Windows 10 based, cloud desktop built on the inherently secure and high performing Azure platform. DesktopReady requires no upfront capital expenditure or separate set up costs.

It takes more than products and technology to deliver digital transformation and modern workspaces, services are vital to realizing success. DesktopReady integrates best-in-class technology platforms, products, and a comprehensive set of services designed to allow you to focus on your customers.
