

ANUNTA

VMware Horizon on Azure:
3-week FREE Proof of Concept

Anytime anywhere access to enterprise data and applications ensuring data security

Organizations across industries are today considering permanent remote working solution for their employees - however their key concerns are employee productivity, providing seamless communication and collaboration, high availability and accessibility to enterprise applications, and ensuring data security.

CHALLENGES

- Unable to implement cloud desktops depending on the EUC requirements.
- Defining the critical success criteria to justify the business case and approve the technology.
- Due to lack of in-house technical know-how, setting up the POC environment can be a tedious and time-consuming process.
- Define clear roadmap to extend POC to production, if the POC is successful.

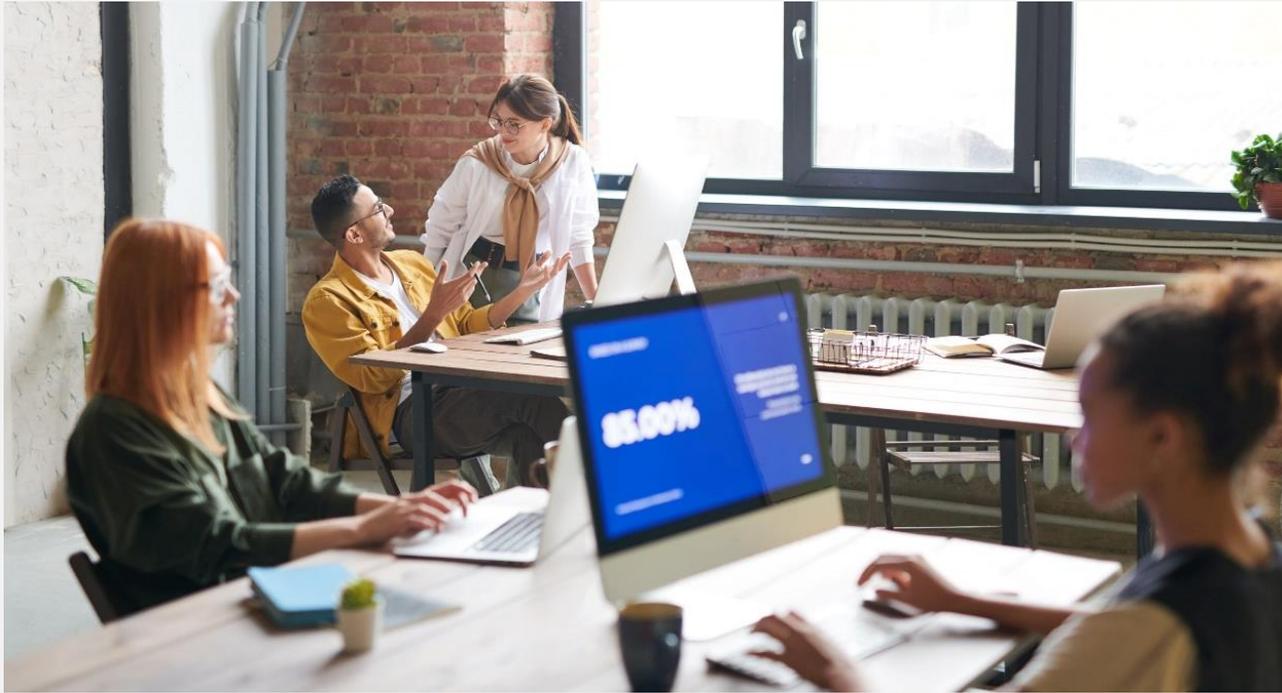

IDEAL SOLUTION

The ideal solution should

- De-risk the process of taking decisions regarding desktop sizing, type of desktops (Single-Session/ Multi-Session) etc.
- Implement best practices.
- Finish the POC in a time bound manner.

DESIRED OUTCOMES

- Quickly test a use case.
- Minimize teething issues.
- Measure success criteria.
- Complete the POC on time.
- Support flexibility to extend the POC setup to production.

Anunta

VMware Horizon on Azure:

3-week FREE* Proof of Concept

Quickly identify and implement a Cloud Desktop use-case and demonstrate the usability of VMware Horizon Cloud + Azure Virtual Desktop (AVD) for 25 users.

The project duration is 3 calendar weeks.

SET UP POC ENVIRONMENT APPROPRIATELY

Quickly navigate your way through multiple complexities such as choosing the desktop sizing, type of desktops (Single-Session / Multi-Session) etc.

OUTCOME DRIVEN AND TIME BOUND POC

Build basic setup and test a use case using VMware Horizon Cloud + AVD for 25 users and 3 weeks.

HIGHLY AVAILABLE, FLEXIBLE AND AGILE AZURE PLATFORM

- Seamless access to Cloud Desktops.
- Choose from an array of desktop size.
- Support extending POC environment to Production environment.

*Most customers with use-cases for 250+ users will qualify for free POC. To know more, please contact us.

Our Customer satisfaction rating stands at 4.75 out of 5 for our consultant's performance and technicality.

Anunta, a VMware Master Services Competency partner in Digital Workspaces and Microsoft Gold partner, helps customers make the right decisions and navigate their way through complexities involved in implementing Cloud Desktops on Azure.

Through our POC services, we will help the customer to identify and implement a Cloud Desktop use-case and demonstrate the usability of VMware Horizon Cloud + Azure Virtual Desktop (AVD).

Benefits

- ❖ Time bound and outcome driven POC services
- ❖ Seamless Integration of Horizon with Azure to meet your POC requirements
- ❖ Use Azure's global footprint to test and take Cloud Desktops near to the End Users
- ❖ Seamlessly extend POC environment to production environment leveraging Azure's Agile infrastructure

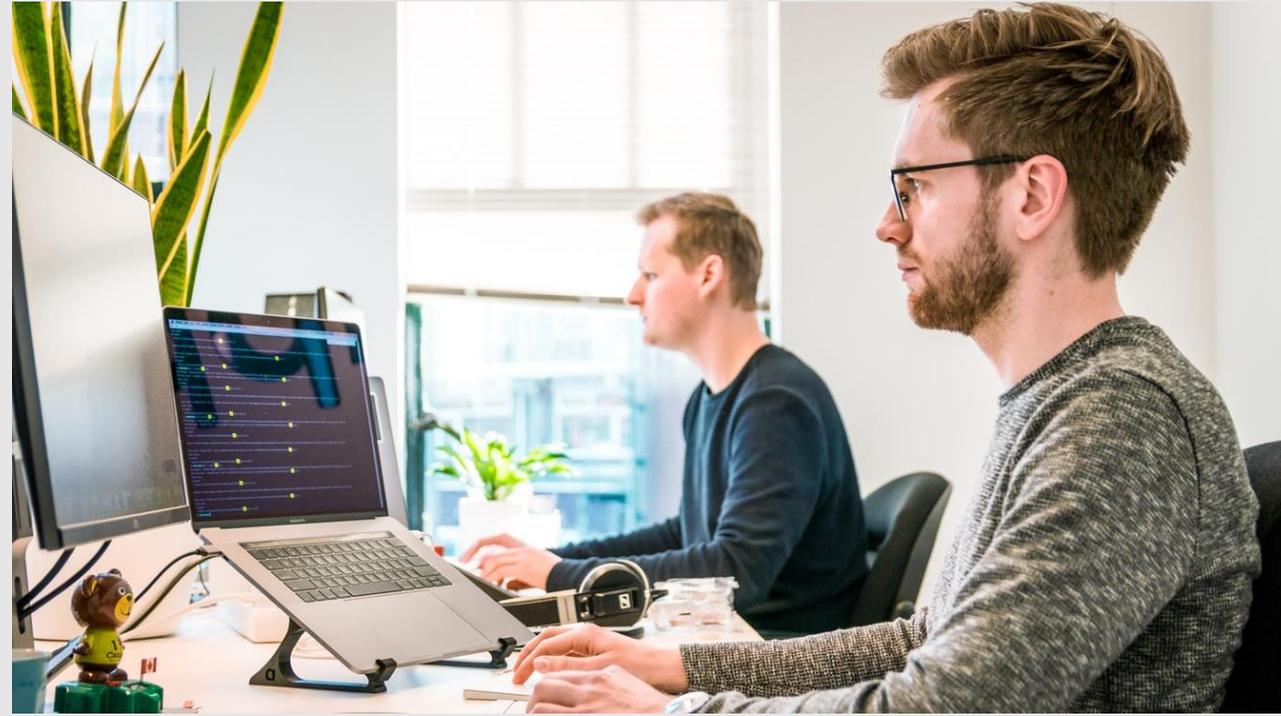

VMware Horizon on Azure: 3-week FREE Proof of Concept

POC Parameters	POC (25 users)
Assessment and planning (~1 calendar week)	
Basic architecture review and identify a use-case	Yes
Prepare prerequisites and onboard Azure tenant	1 Azure POD
Configure network connectivity	VPN
Integrate Active Directory	1 AD
Setup VMware Horizon cloud management plane	Yes
POC execution (~1 calendar week)	
Configure VMware Horizon	Yes
Configure basic AppVolumes, DEM, Drive Share mapping, Workspace ONE Connector, SSO using Workspace ONE Access	<ul style="list-style-type: none"> • AppVolumes (demo 1 predefined setting) • DEM (demo 1 predefined user settings, 1 COTS app settings and 1 predefined computer settings)
Build and test 1 use-case	<ul style="list-style-type: none"> • 1 image using either Windows 10 Single-Session or Multi-Session • Desktop/Utility servers (AD and File Server)
Integrate applications	Up to 10 Commercial off-the-shelf applications
Integrate peripherals	Up to 2 supported peripherals
Configure user workload	Yes
Users to test virtual desktop (~1 calendar week)	

Customer success: Helped a Government Agency in Hawaii to take its first step towards Cloud Adoption

The Agency already had an on-premises virtual desktop environment on VMware. Anunta provided Horizon on Azure POC services to test use cases, application compatibility etc. for Agency's initial 50 users' EUC requirements using Horizon on Azure technology, ensuring improved login speed and secure access to work environment.

"It was overall good experience working with your team"
– Senior IT Solution Architect

Seamless Integration

Tested the compatibility with applications and peripheral devices, such as printers and scanners.

Improved Login Time

The session login time was improved to 15 seconds for subsequent logins.

Secure Access

Desktops and access were provided to the respective users as per their profiles. Security protocols such as LAPS client and restricted internet access were enabled.

ABOUT ANUNTA

Anunta is a global cloud-based End User Computing (EUC) solutions provider focused on Managed Desktops and Digital Workspace solutions.

Delivering Unmatched End user Experience Globally

 **500,000+** Remote Desktop Users Served

 **200,000+** User Desktops Managed

 **1,000+** Applications Assessed and integrated

Top Customers Served

 4 of the top global BPM providers	 5 out of 10 private banks in India	 Top European Financial Services company	 Large Multinational Retail Corporation	 American Multinational Media and Entertainment Conglomerate
