## VALORANT CASE

**First 30 days**  
**13 500 users**

In the first 30 days, Anybrain was tested on Valorant in one segmented geographical G-Loot area. During this time: 13 500 unique users were tracked.

**979 cheaters**  
**Were detected**

7% of the players in the segmented area were detected with fraudulent/cheating behaviours.

**400 unique**  
**user-id's**

From the 979 cheaters who were detected, there were 400 unique users. This means that almost 50% of the user were using more than one account.

**150 players**  
**banned**

37,5% of the detected unique users were banned from G-Loot. The rest of the players was able to continue to play for further investigation.

**Saving 1/2**  
**day of work**

During this 30 days period, G-Loot Player Protection Lead saved half a day of work each day, while using Anybrain.
