# AODOCS

Trusted AI: reliable answers from knowledge you control

GROUNDED

The AODocs AI Assistant's answers are **grounded on your controlled documents**, providing users with **trusted information**, based on the user's specific context and **respecting the user's access permissions**.

RELIABLE

AODocs provides an **end-to-end AI solution** (from document repository to chatbot), to process your documents **reliably and at scale**. Integrate our **AI services API** easily with your own chat interface, or with your business applications.

SECURE

The AI Assistant can use **your company's approved Large Language Model** to process your information, and **respects your company's security constraints** such as your network landing zone, API gateways, private AI hosting, and more.

Manufacturing

Quickly find the right information from manufacturing instructions, technical documentation and safety procedures. Analyze defect reports, warranty claims and product feedback and build AI-powered dashboards

Engineering & Construction

Use natural language to get trusted answers from design documents, specifications and tech bulletins. Leverage AI to analyze the impact of engineering changes and avoid costly mistakes.

Healthcare

Improve care quality and safety by providing physicians and nurses easy and immediate access to health protocols, operating procedures and medical information, via natural language.

Professional Services

Increase productivity by providing consultants with easy access to internal knowledge. Identify and leverage past work that can be re-used when preparing proposals or creating deliverables.

AI-Enabled Content Services for your Critical Documents

Version control
Configure validation workflows and change request processes that match the level of change control your organization needs.

Full traceability
Ensure all changes and validations on your critical content are auditable. Easily visualize the change history of your controlled documents.

Data Extraction
Categorize your documents and extract relevant information (expiration date, supplier name, etc) without tedious manual work.

Trusted AI assistants
Ask any question you want to your content and get concise and precise answers, generated by the AI based on (and only on) your trusted content.

Process Automation
Reduce human errors with easy to configure business workflows, involving both your employees and your suppliers, clients, contractors and partners.

Easy Integration
Integrate easily with all your information systems, every AODocs feature is available as an API.

Easy Migration
Migrate your content from SharePoint, FileNet, Documentum, and other legacy systems with our built-in tools scaling to 100s of millions of documents. Leverage AI to tag and prioritize the content to be migrated.

Enterprise Security
Protect and control your critical documents with our secure, SOC2 certified platform, already trusted by Fortune 500 customers. Control every aspect of the storage of your content, from its physical location to its encryption keys.
