

DifHub

Ecosystem for Architects and Developers

DifHub creates Application design in the form of rich and platform agnostic Metadata and allows to automate usage of this Metadata in the software code. DifHub enables platform specific deployment automation

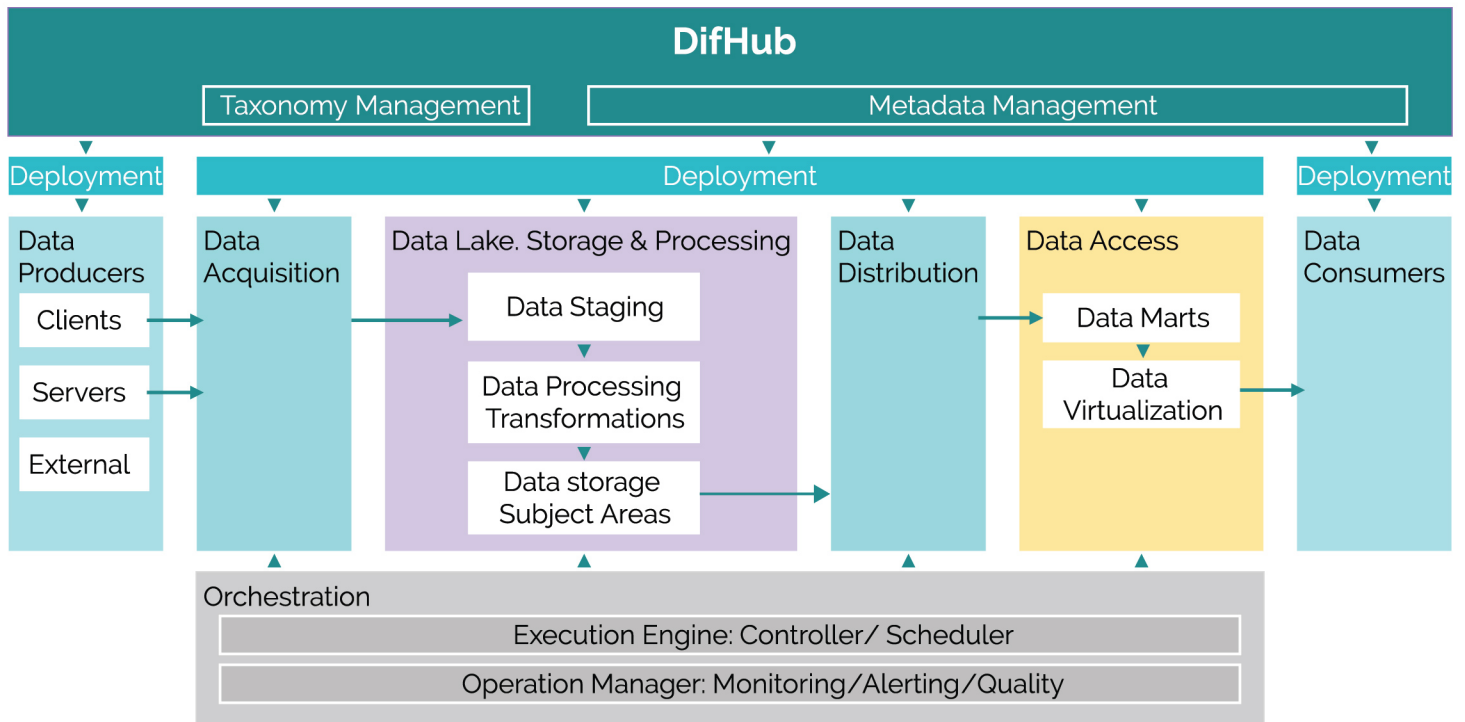

DifHub & Architecting Data Applications

Creator's concept of data application > **DifHub BLUE PRINT** > GitHub SOURCE CODE > CI/CD pipeline > Platform > Running application

DifHub

CI/CD

Architecting Data Lakes

CI-CD pipeline and execution environments
