Value Proposition

The whole process of translation using Translate.website is 100x faster than any other process in the world.

Manual Translation
Process Step

Key Features

Say goodbye to language barriers and hello to a seamless, multilingual online experience.

No-Code Solution

Translate.Website requires no coding skills, making it accessible to users with limited technical knowledge. It eliminates the need for manual code changes, saving time and effort in the translation process.

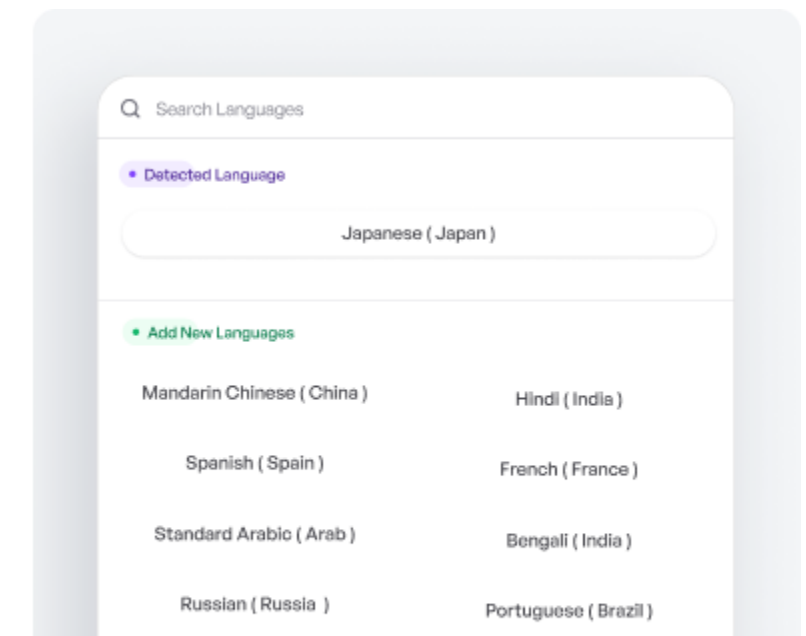

Real-Time Translation

Translate.Website offers both Client-side translation and Server-side rendered translation options. Client-side translation allows instant translation of website content without reloading the page.

On-the-fly translation

Translate.Website automatically picks up new content and updated content from the website & translates it, without any human intervention. Our Intelligent AI Systems monitors your website 24x7 for new content

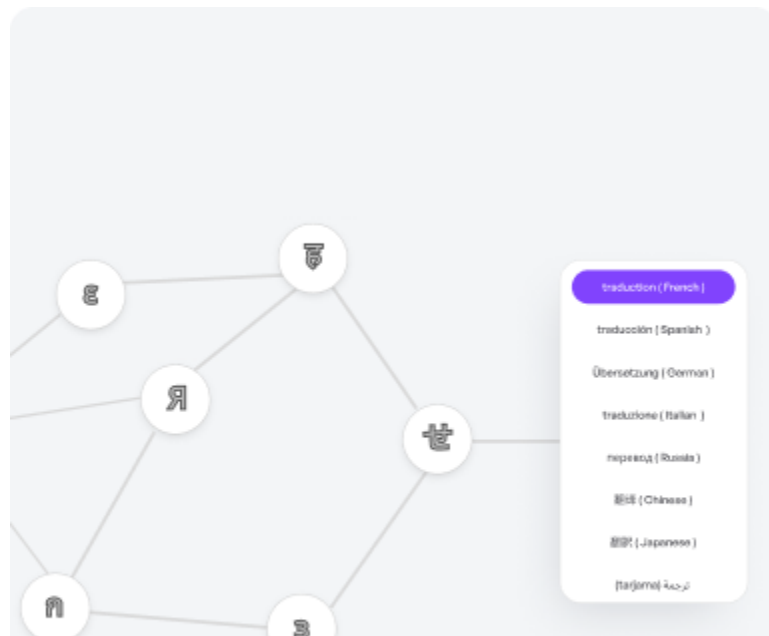

Automatic Language Detection

Translate.Website automatically picks up new content and updated content from the website & translates it, without any human intervention. Our Intelligent AI Systems monitors your website 24x7 for new content

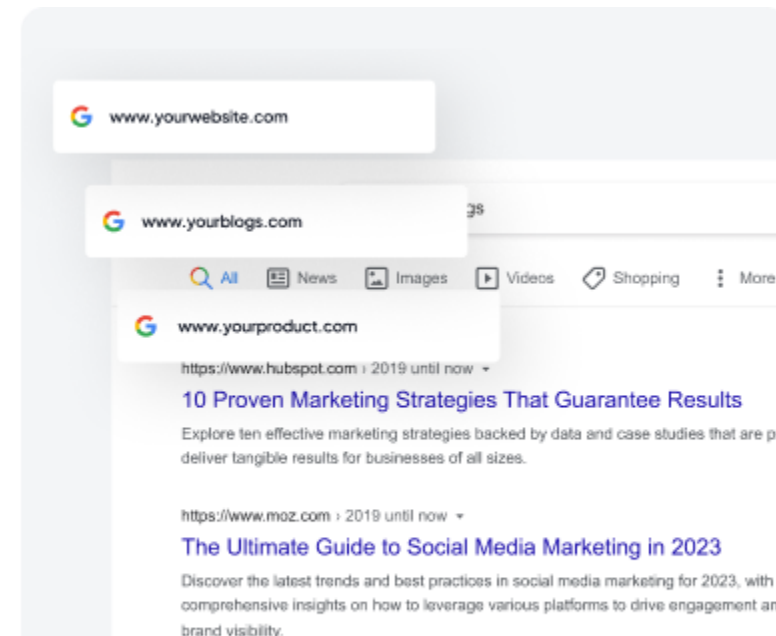

Key Features

Why limit your reach when the world can be at your website's doorstep?

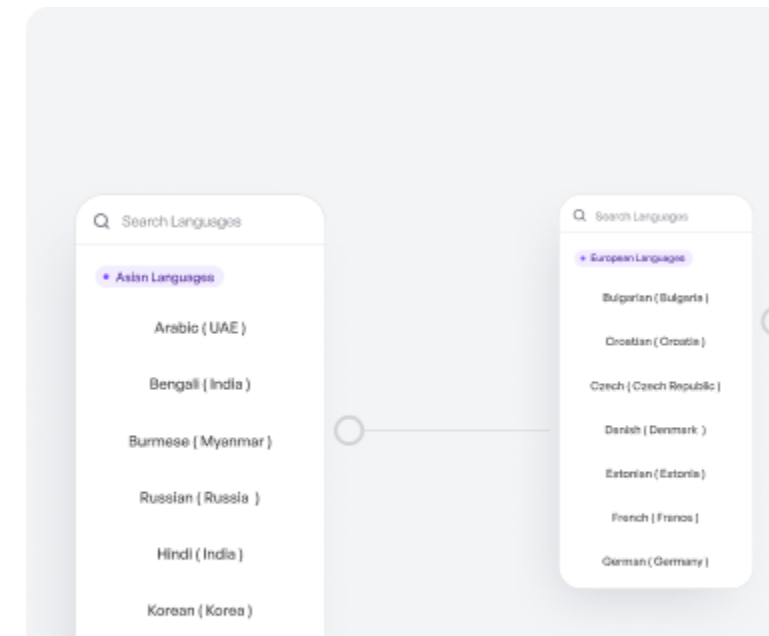

Translation Memory

Translate.Website utilizes a translation memory & glossary system that stores previously translated content. We also provide an option for Proofreading where we can get the translations proof read for you.

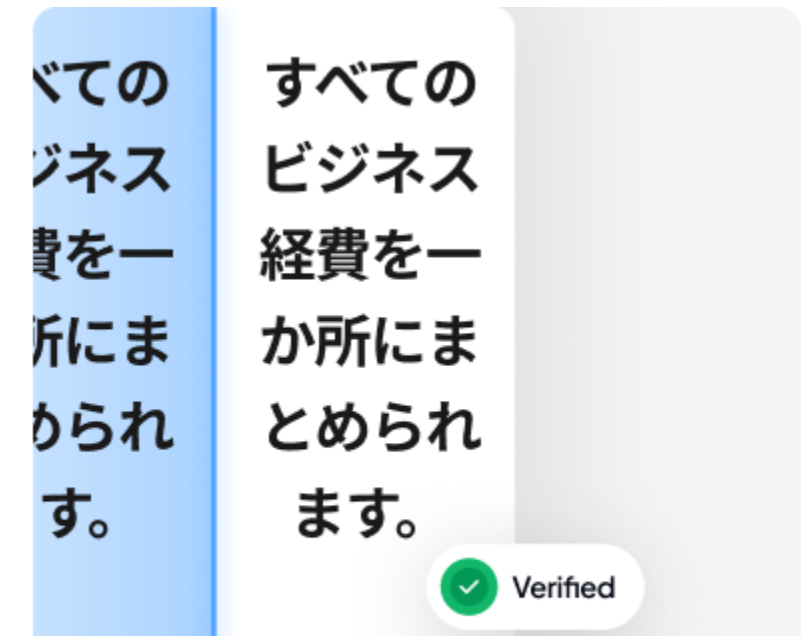

SEO-Friendly Translation

Translate.Website ensures that translated content is optimized for search engines. It generates language-specific URLs and meta tags, improving the website's visibility in different languages.

Language Selector

Translate.Website provides a customizable language selector that can be easily integrated into any website design. Users can choose from a wide range of languages to offer their visitors a personalized browsing experience.

Context Aware Engine

Our AI is Context Aware, providing relevance to translation. It's not a word-to-word literal translation.
