What we offer?

The service enables employees to log into Windows 10 and use the Azure infrastructure.
Thanks to this, we can automatically scale resources if an employee needs more resources.
The employee can log in to his desktop from anywhere (office, home, hotel, etc ...)

As part of the Azure Windows Virtual Desktop implementation service, we offer requirements gathering, Azure infrastructure configuration, preparation of Windows 10 images, knowledge transfer, MFA security configuration and testing execution.

Contact us

The company will achieve real benefits from launching the services. It is worth mentioning a few of the most important:

- lower TCO costs
- high resource
- scalability
- remote access
- data and application
- security

Scope of work of the service:

- Analysis and collection of requirements for user desktops and applications [1 Day]
- Development of the project the target structure of Windows Virtual Desktop [1 Day]
