

The specialists for emissions data in transport & logistics

# Take your emissions controlling to the next level

For all gamechangers in transport & logistics

# We enable your data-driven journey to zero-emissions logistics

## Calculate

Gain compliant calculation on Scope 1 | 2 | 3 emissions and full emissions transparency. shipzero is your single source of emissions data for all logistics processes. We provide auditable information on a granular shipment level, compliant with ISO 14083 and GLEC 3.0.

## Report

Generate precise and automated reports with just a few clicks. We take care of the time-consuming data management process for regulatory and client reporting.

## Reduce

Discover data-based reduction potentials to decrease freight emissions and set targets to reduce your company carbon footprint.

## Why shipzero?

# Outstanding data expertise & quality standards

### Taking over the entire process

shipzero takes care of the entire process, from data management to gaining high-quality insights. No need to enter data manually, we automate the process so that users have as little work as possible.

### High calculation depth

Our calculation is based on the most accurate method available. As specialists for primary data, we connect partners along the supply chain for secure data exchange. That saves time, costs and ensures precise emissions data.

### High data quality standards

We integrate and harmonize data from different sources and help companies to overcome data quality issues, by using a precise data quality/clarification process.

### Enabling new business models

We go beyond CO<sub>2</sub> reporting and enable new business opportunities, such as auditable green freight services and carbon insetting measures (e.g. Book & Claim).

## Aligned with international standards

Carbon accounting requires transparency, traceability, and documentation to create comparable and audit-proof results – just like financial accounting. Our platform ensures alignment with internationally recognized disclosure and reporting standards.
