Appfie

Governance

OUR JUST CAUSE

# FRICTIONLESS DIGITALISATION

IN EVERY CORNER OF YOUR ORGANISATION

*Reduce any cultural, technological & organisational friction that is holding you back in delivering true digital value*

HOW DO WE ELIMINATE FRICTION?

# HYBRID DIGITALISATION

TRANSFORM YOUR ORGANISATION INTO A DIGITAL VALUE CREATION FACTORY

Level of "easiness" moves  
year after year

**Citizen Development**  
"Close the last mile"

**Rapid Application Development**  
"Build robust digital solutions"

"SOLUTION" SOPHISTICATION

NO CODE

LOW CODE

PRO CODE

Convergence of both worlds

CREATE SUPERSONIC DIGITAL VALUE

# RAPID APPLICATION DEVELOPMENT

**Leverage** our experienced Power Platform development team to increase your business productivity. Let us identify your pains and gains through the **Microsoft Catalyst framework**, and turn them into **valuable business apps**

# TRANSFORM DIGITAL NATIVES INTO EMPOWERED CITIZEN DEVELOPERS

# POWER PLATFORM MENTORING

Accelerate the transformation of your digital natives into citizen developers through our **mentoring program**. Next to building up **competences** we will drive the citizen developers into delivering **valuable use cases** for your organisation.

# EMBED A HYBRID DIGITALISATION FRAMEWORK

# LOW CODE GOVERNANCE

Successfully embed low coding as an additional pillar within your digital transformation strategy through our **low code accelerator program**. Get the most out of the Power Platform and eliminate any **governance** concerns in no time.

# FIND DEDICATED POWER PLATFORM EXPERTISE

# LOW CODE REBELS

Leverage our Power Platform experience in combination with dedicated resources. Thanks to our **Power Platform mentoring service** the **rebels are actively coached & supported** during their low code journey

*Accelerate my digital transformation journey*

## EMBED A HYBRID DIGITALISATION FRAMEWORK

Successfully embed low coding as an additional pillar within your digital transformation strategy through our low code accelerator program. Get the most out of the Power Platform and eliminate any governance concerns in no time.

### Organisational governance

Focus on the organisational aspect of Low Coding:

- People & competences
- Roles & responsibilities
- Processes & procedures
- Business value & Community building

### Platform Governance

Focus on the technological aspect of Low Coding:

- Enterprise architecture & Data governance
- Application Lifecycle Management
- Security
- Monitoring

# Power Platform Governance

## Maturity framework

### Initial (L100)

### Repeatable (L200)

### Defined (L300)

### Capable (L400)

### Efficient (L500)

- **Strategy** – Innovation bottom up driven, low complexity scenarios, limited adoption and undefined strategy
- **Business Value** – No formal business value and undefined targets
- **Governance** – No environment & security strategy
- **Support** – Makers support their own apps, no clear R&R between IT & Business
- **Nurture** – Some people followed App In a Day, limited team-based initiatives for nurturing makers
- **Automation** – Processes are largely manual and one-off
- **Fusion Teams** – Teams work independently, no pro dev use of Power Platform

- **Strategy** – Common vision between IT & Business, demand management takes form
- **Business Value** – No formal business value, business cases understood but lacking review
- **Governance** – Service admin role assigned, default environment covered by security, CoE toolkit installed and initial use started
- **Support** – Some degree of commitment and governance measure to manage solution lifecycle
- **Nurture** – Onboarding strategy for new makers, makers become ambassadors across their departments
- **Automation** – Processes are standardised, but implemented manually
- **Fusion Teams** – Teams review each other's work, pro devs pilot high-value use cases

- **Strategy** – Dedicated Power Platform Product Owner, bottom up and top down innovation, defined understanding of the required roles in your organisation
- **Business Value** – KPIs understood and reviewed against goals, delivery based on use cases with the highest business value
- **Governance** – Environment & security strategy in place, monitoring of app usage and adoption
- **Support** – Helpdesk involvement, support levels based on solution criticality
- **Nurture** – Makers provide insights into business pain points, creation of an internal champions community
- **Automation** – Environment & DLP requests are automated
- **Fusion Teams** – Teams plan work as a team, but operate independently, teams manage source control and app lifecycles, consumption by makers of libraries/custom components, ...

- **Strategy** – Established CoE, cross-divisional activities start to take place
- **Business Value** – Quantitative & qualitative measures used to understand and improve business efficiency
- **Governance** – Overshared, unused & orphaned resources are taken care of, operations team look after tenant hygiene, maker responsibilities clearly defined and automatically communicated
- **Support** – Dedicated support team, clearly understood R&R
- **Nurture** – Active participation in champions community, sharing and celebration of success stories, show & tell sessions, adoption campaign
- **Automation** – ALM processes are defined and implemented centrally, automation of admin/compliance/support information tasks
- **Fusion Teams** – Cross-functional teams plan and execute work jointly, collaborative planning for infra & change enablement, use of common data models to aid data reuse

- **Strategy** – Successful hybrid digitalisation at scale and the Power Platform as a core architecture component of your IT landscape
- **Business Value** – Executive level acknowledgment of business value of Power Platform solutions
- **Governance** – Self-service governance & administration capabilities
- **Support** – Self-service support capabilities
- **Nurture** – Large community, established career paths
- **Automation** – Environment lifecycle management is automated
- **Fusion Teams** – Teams form seamlessly to accommodate cross functional skills, common development strategy and goals for citizen and pro-developers needed for new projects

# Appfie Power Platform Governance

L100

## Initial (L100)

- **Strategy** – Innovation bottom up driven, low complexity scenarios, limited adoption and undefined strategy
- **Business Value** – No formal business value and undefined targets
- **Governance** – No environment & security strategy
- **Support** – Makers support their own apps, no clear R&R between IT & Business

- **Nurture** – Some people followed App In a Day, limited team-based initiatives for nurturing makers
- **Automation** – Processes are largely manual and one-off
- **Fusion Teams** – Teams work independently, no pro dev use of Power Platform

## How to get there?

- STRATEGY - Follow one of our “hybrid digitalisation” webinars
- STRATEGY - Visualise the current “state of use” of the Power Platform
- BUSINESS VALUE - Let us organise an “Inspire & Capabilities” workshop within your organisation
- GOVERNANCE - Let us organise a “Hybrid Digitalisation Governance” workshop within your organisation
- SUPPORT – Allow the first citizen developers to get help when implementing their first use cases
- NURTURE - Follow one of our xIADs
- NURTURE - Organise a Power Platform hackathon
- NURTURE – Define onboarding process for citizen development

# Appfie Power Platform Governance

L200

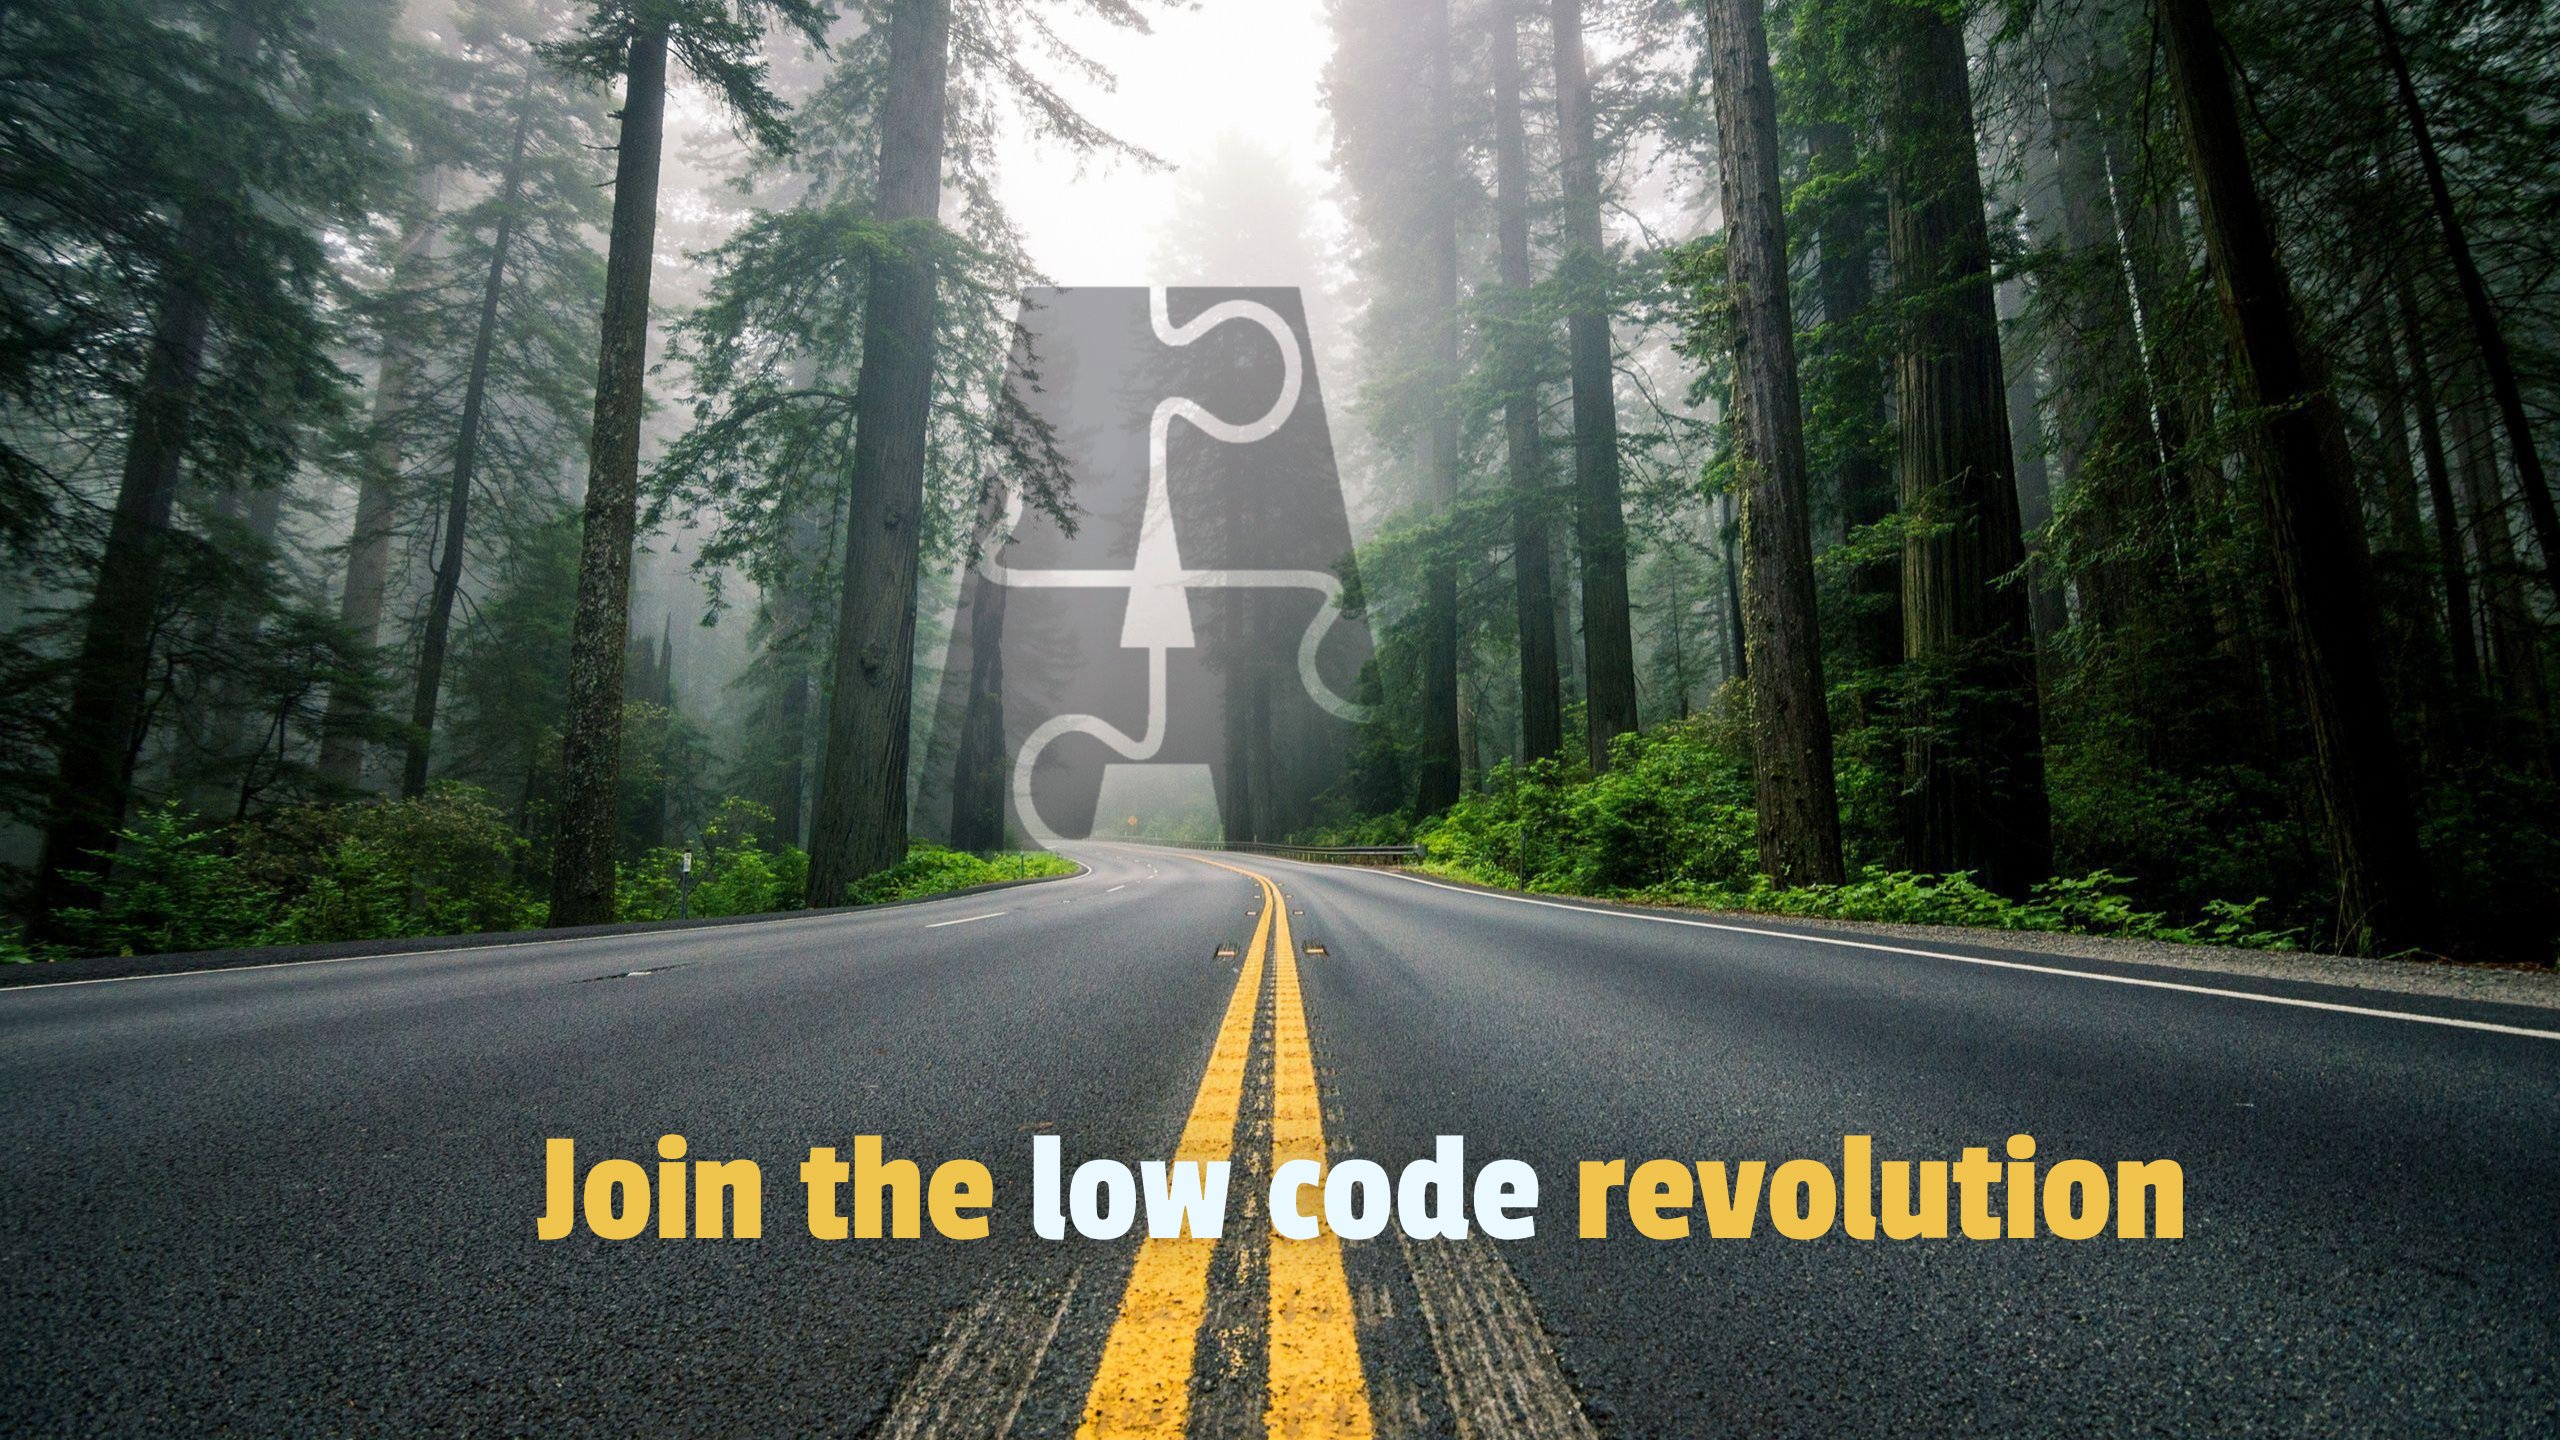

## Repeatable (L200)

- **Strategy** – Common vision between IT & Business, demand management takes form
- **Business Value** – No formal business value, business cases understood but lacking review
- **Governance** – Service admin role assigned, default environment covered by security, CoE toolkit installed and initial use started
- **Support** – Some degree of commitment and governance measure to manage solution lifecycle
- **Nurture** – Onboarding strategy for new makers, makers become ambassadors across their departments
- **Automation** – Processes are standardised, but implemented manually
- **Fusion Teams** – Teams review each other's work, pro devs pilot high-value use cases

## How to get there?

- STRATEGY - Define strategic objectives of the Power Platform
- STRATEGY – Simplified R&R matrix for demand management
- BUSINESS VALUE – Use our mentoring framework to visualise the potential value of the use cases
- GOVERNANCE - Setup of the CoE toolkit & rollout of the first module(s)
- GOVERNANCE – Minimal implementation of governance requirements
- SUPPORT - Continued mentoring framework
- SUPPORT – Simplified R&R matrix for application lifecycle management
- NURTURE – Setup first set of community activities & required platforms (eg. Sharepoint)
- AUTOMATION – Define & describe governance processes (eg work instructions for DLPs, environments, ...)
- FUSION TEAMS – Advise the company on how fusion teams should be established
