AIS' Azure Government Migration Proof of Concept (POC)

Fast track cloud transformation with a rehost, then modernize migration approach

ais **APPLIED INFORMATION SCIENCES**

Engagement Approach

AIS delivers a Rehost Migration Proof of Concept as a fast path to the cloud, often followed by a phased migrate and modernize strategy for the rest of your application portfolio.

PHASE ONE
Plan & Assess

The assessment and planning phase includes an initial review of your organization's portfolio to identify a non-mission critical, low risk initial pilot application application for the rehost migration to Azure Government.

PHASE TWO
Build & Migrate

Architecture definition and implementation of an Azure Government Landing Zone cloud infrastructure for hosting and operating the candidate POC application.

PHASE THREE
Validate & Test

Conduct validation of the migrated POC application to the Azure Government Landing Zone infrastructure and perform user acceptance testing and certification of business capabilities.

Rehost to Initiate Cloud Transformation
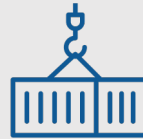

Invest Less, Get More

Spend minimal time and money moving legacy apps in a datacenter to the cloud and still realize significant results.

Flexibility to Scale

Easily reproduce the on-premises environment in the cloud as virtual servers/ storage with the flexibility to scale.

Preserve Functionality

Modernize your application hosting environment without significantly altering core functionality.
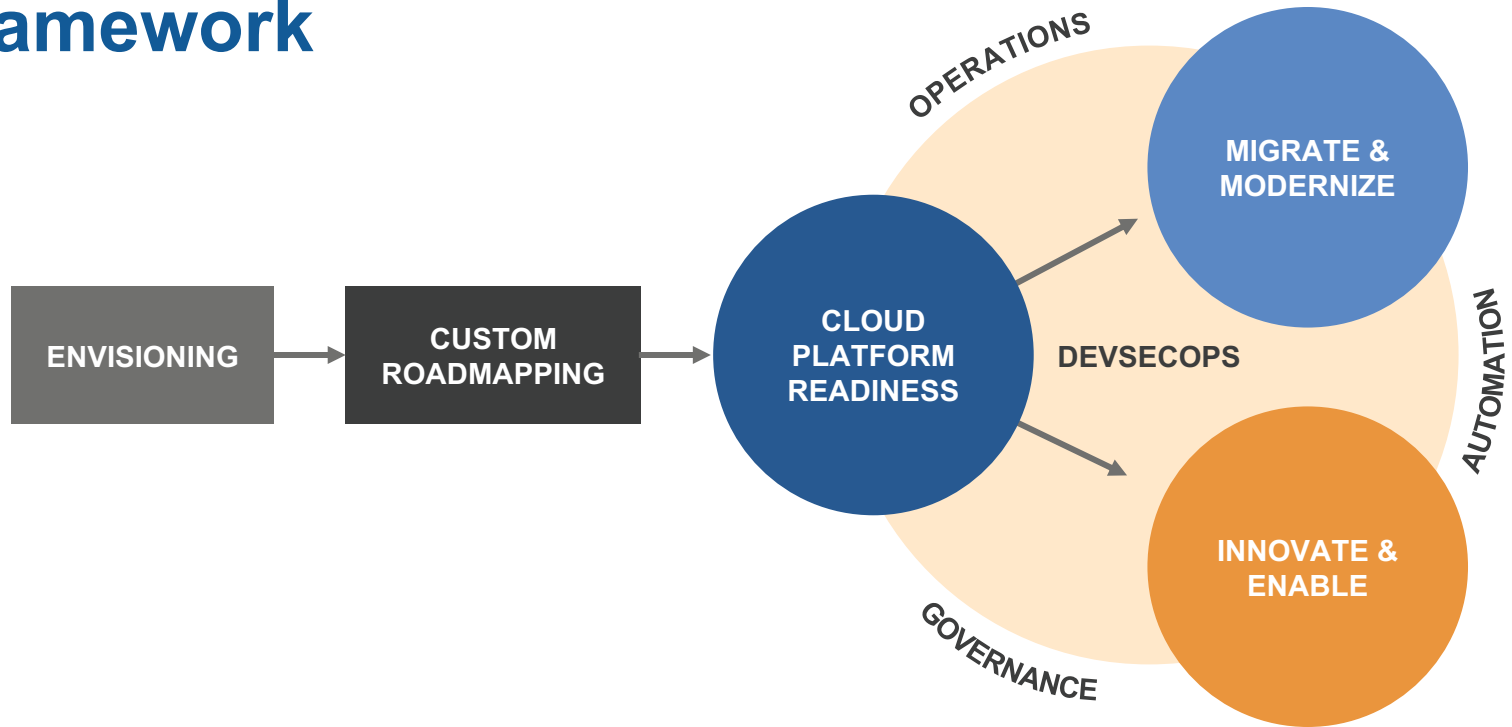

Reduce Challenges

Rehosting in the cloud alleviates common challenges related to provisioning infrastructure in on-premises data centers.
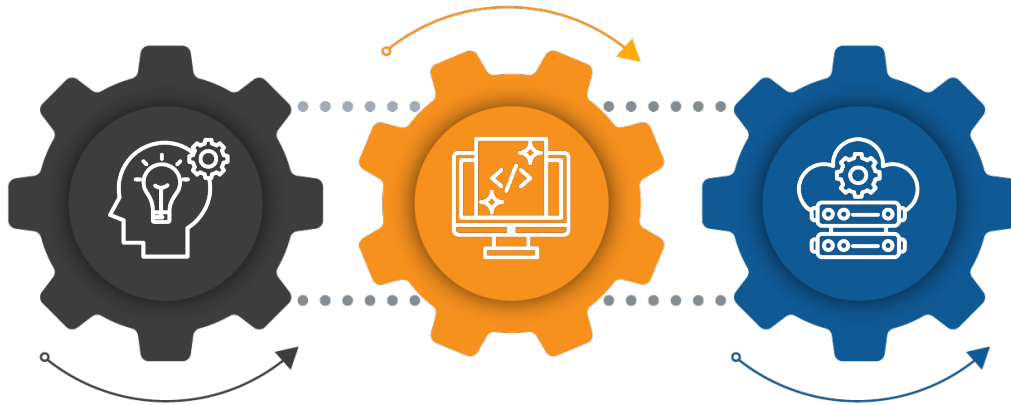

Monitoring & Analytics

Enable monitoring and reporting analytics on performance, compliance, security, and more.
