Azure OpenAI Generative AI Jumpstart

Accelerate Adoption of Generative AI Technology to Transform Your Business with Azure OpenAI

Our Azure OpenAI Center of Excellence (CoE) Jumpstart engagement allows your organization to benefit from the Generative AI expertise we've formulated since 2022 and years of CoE leadership experience to build a custom-tailored CoE model. Quickly and safely deliver real business value solutions on Azure OpenAI with the right support model. AIS works with you to define a cross-functional CoE team's purpose, scope, roles, responsibilities, and processes that will enable your organization to prepare for, deliver, and manage Generative AI solutions. After this engagement, you will have a defined plan and approach to begin managing the profound opportunity, new risks, and organizational change that adopting Generative AI technologies bring.

Benefits of this engagement:

Initiate Adoption: Take one of the most critical steps in setting up your organization to harness the transformative power of Generative AI.

Assess Readiness: Gain valuable insights into your organization's preparedness for building and managing Generative AI solutions.

Understand Risks: Identify critical risks and organizational changes necessary for a successful adoption of Generative AI technologies.

Start Your CoE: Define your operating model and team structure in a CoE charter and develop your implementation plan.

Engagement schedule:

Customers ready to build and manage Generative AI models will engage with AIS to:

- **Understand your Vision, Strategy, and Opportunities** with Generative AI solutions and review potential use cases to inform your CoE set up
- **Conduct a Risk Assessment** to bring understand to possible risks and develop realistic mitigation plans
- **Identify Skills, Knowledge, and Training Requirements** to level up your team to support this new technology domain
- **Customize our CoE Charter Template** with defined team roles, responsibilities, and processes
- **Develop a CoE Implementation Plan** with actionable steps so you can begin adding value

Why Work with AIS?

Deep Azure Platform Expertise: We've been working with Azure since 2008 and have helped some of the earliest, largest Azure adopter achieve their goals.

Globally-Recognized Expertise and IP: AIS is recognized for our AI leadership and industry-leading delivery capabilities, ensuring you're working with the best of the best.
