

Activate Data Driven Insights with Azure OpenAI in 30 Days

What we offer

This Microsoft-funded engagement helps customers demonstrate the value of OpenAI for their organization and lays the foundation for adoption.

Target business outcomes for customers may include decreasing the administrative burden of employees, improving user and customer experiences, and increasing data accuracy and insights through the safe and secure use of AI.

Our approach:

- Kickoff with three workshops to identify business objectives, data sources, the current landscape & OpenAI use cases
- Next, we tackle the architectural design and build a minimal landing zone
- Finally, we enable your team through knowledge transfer sessions for the subscription, design options, cost & more

About AIS:

AIS specializes in IT transformation for large commercial and federal enterprises, delivering compliant and transformative cloud and data solutions that speed up time to value, sunset legacy technology, and accelerate innovation. Our expertise lies in the highly regulated environments leading migration and modernization, DevSecOps, security and compliance, custom app development, and data intelligence. Our analysis-driven approach to solving business problems—combined with our commitment to deadlines and budgets—results in successful projects and long-term relationships with our clients. We're a leading Microsoft cloud partner with proven capabilities and a track record of success.

Deliverables

- Workshops on business objectives, use cases, and current state
- Deployment of a data landing zone
- Azure cost estimates
- Azure tenant with Azure Data Services deployed
- Knowledge transfer sessions
- Recommended data roadmap

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.
