Connecting Doctor and patient virtually

Time saving for both Doctor and patient during Doctor's consultation and Reduce risks of cross-infection via ClinicONE™ Telemedicine.

CHALLENGES

Patients are unwilling to visit Doctor due to COVID-19 & cross-infection worries particularly for the patient with mobility concerns. Patient also affects that Telemedicine would sacrifice the communication and detail of understanding patient's syndrome.

THE SOLUTION

ClinicONE™ Telemedicine module allows patient to reserve Doctor's appointment through web or mobile app for Doctor's earliest availability and closest location while in compliance with legitimate medical acts & requirements.

THE OUTCOME

Patient receives their prescription in 2 hours for an enriched Doctor consultation remotely without sacrifice the professionalism and detail of care together with connected M.IoT devices.

Doctor

Clinic Management system

- Multi-Specialist SOAP Templates
- Dispensary & Advanced Billing
- Real-time Appointment & Ticketing TV Display
- Secure EMR & Backup
