The Problem

Technology continues to grow. Classic programming is expensive and slow. No-code platforms are inflexible. There needs to be a dependable middle option.

Businesses want apps but developers are in short supply

Development is time-consuming and expensive

Senior developers are expensive and highly sought after

Teams need an intuitive interface to allow junior programmers to play roles

Expansive skillsets are needed for contemporary apps, especially for Security

Slow development means losing business opportunities

The Solution

Jetveo Platform and App Builder

Built for Developers by Developers

Flexible development, with many ready tools

The speed and simplicity of low-code development

The power of existing C# programming to eliminate repetition and provide room for customization

The Solution

Senior Developers get a full toolbox that even Junior Developers can use.
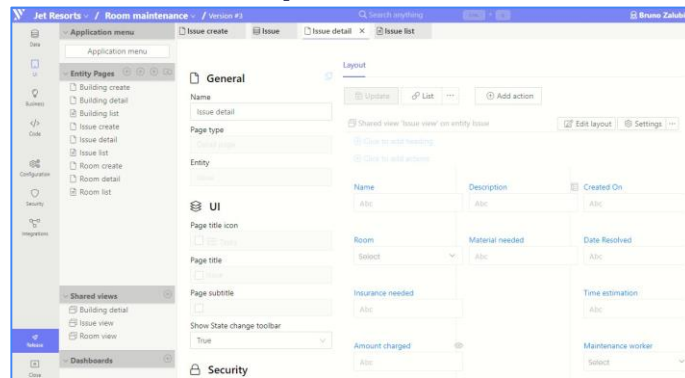

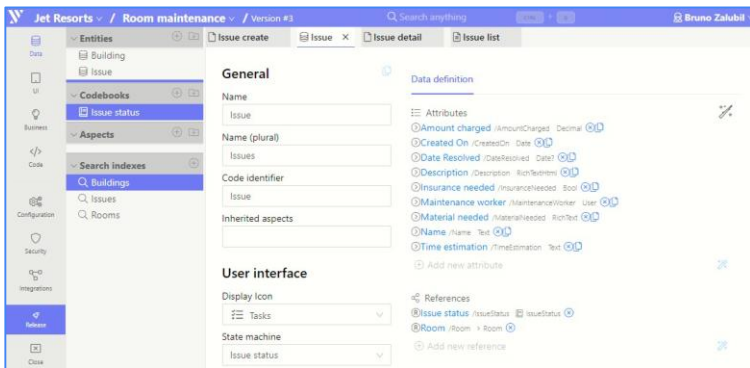

The platform and app builder handles the following areas for you:

Data   UI   Security   Scaling   Deployment   Hosting   Backups   Migration

Architecture   Authentication   DMS   Native App Integration   Translations

Monitoring   Payments   External Integrations   and more...

Pluses and Minuses
Jetveo is the best of both worlds, incorporating the positives and mitigating the negatives.

Low-/no-code platforms:

- ✓ Simple click-and-play tools
- ✓ Many templates / plugins / solutions / integrations
- ⊖ Difficult to learn custom scripting languages
- ⊖ Very limited in functionality, suitable only for common and simple usages
- ⊖ Often need a combination of additional tools / platforms to implement complex logic

Classic programming:

- ✓ Flexible
- ✓ Standard
- ⊖ Lengthy and expensive
- ⊖ Team of senior developers are necessary to deliver robust, quality applications

Jetveo Platform and App Builder

We started the Jetveo Platform and App Builder because we knew, as programmers, that there had to be a better way to create apps quickly and inexpensively.

Try it and see.
