No-Code Platform

Your Digital Transformation Made Easy!

Health Care

Digitize Healthcare Processes - Improve patient care and experience, streamline operations, make healthcare more accessible and cost-effective

- Hospital and clinic management system
- Patient registration & care management
- Virtual consultation
- Data management and analytics

How Digital Transformation can reform the Health Care Industry

- Manage Patient Data
- Automate and integrate processes
- Handle transactions - Automate billing, orders and claims
- Get patient experience feedback, pharmacy and lab service feedback
- Vaccine Registration And tracking
- Publish News and events, and notifications

Digitize Processes

- Reduce clerical work- reduce human data entry errors, process claims faster and reduce physical storage requirements
- Efficiently assign tasks, prepare for emergencies, avoid overburden and burnout of staff members

Bridge the Data Gaps

- Access Patient provided data, lab reports, pharmacy data all in one platform
- Use data to monitor, predict health risks and devise long term care plans

Increase Savings

- Optimize your hospital processes to increase savings
- Take effective actions backed by data to grow profitability

Key Impacts

Shipping & Logistics

Keep up with the increasing demands in global trade and rising customer expectations - adopt digital solutions for the logistics industry

- Operations and Maintenance
- Asset Management
- Compliance Management across geographies
- Order Management

How Digital Transformation can Reform the Shipping and Logistics Industry

- Track Assignments - Manage delivery tasks from warehouse to delivery address
- Customer and Fleet Management
- Digitize Documentation, digital signature, e-verify
- Approvals and Controls
- Billing and fee management
- Maintain statutory and non-statutory documentation

Bring Transparency

- Use real time data for transport planning, tracking and tracing, billing, auditing and payments
- Enable your organization to anticipate roadblocks and plan ahead for risk mitigation

Manage Assets

- Improve the uptimes, performance and availability of logistics assets by predictive maintenance.
- Assess equipment reliability and recognize early warning signals.

Generate Savings

- Increase your savings by handling compliance management, regulations checklists
- Reduce upto 70% maintenance cost through warranty management, Optimize maintenance schedule to generate upto 30% savings
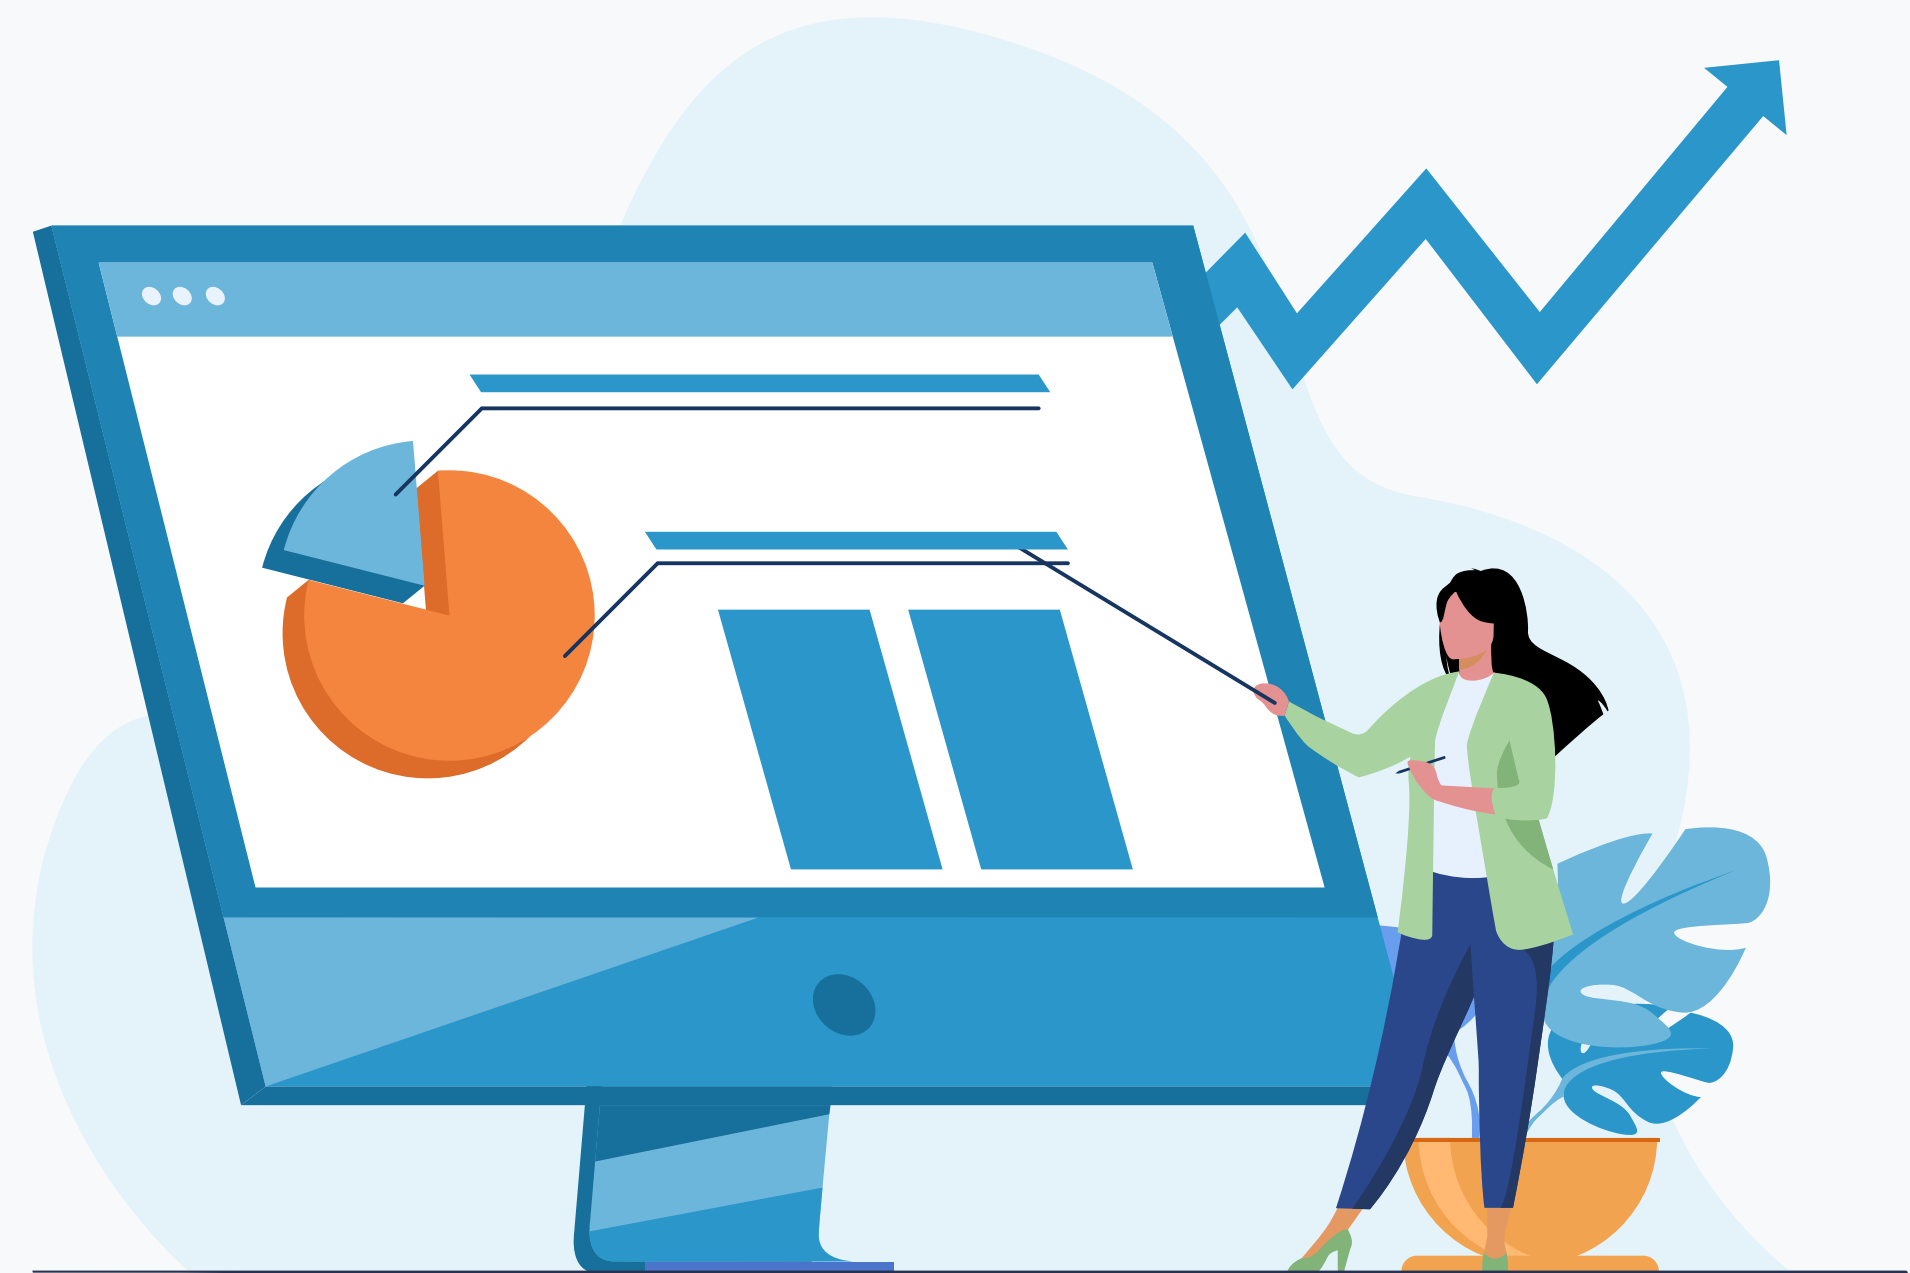

Key Impacts

Finance

Become more agile, efficient, and scalable in the constantly changing Finance and Fintech sector

- Process Automation
- Data Administration
- User Onboarding
- Workflow Management

How Digital Transformation can Reform the Financial Sector

- Know Your Customer (KYC)
- Onboard Retail/Institutional Clients
- Workflow Managements
- Multi Factor Authentication using Biometrics
- Smart Card based Transactions
- Behavioral AI fraud prevention

Easy client onboarding

- Go paperless - onboard customers digitally
- Automate alerts, notification

Improve Customer Service

- Create easy and user friendly interaction platforms
- Create custom financial services, delivered directly at lower-cost

Enhance Product Delivery

- Build custom workflows- seamless and quick turnaround
- Create efficiency and process savings by going digital
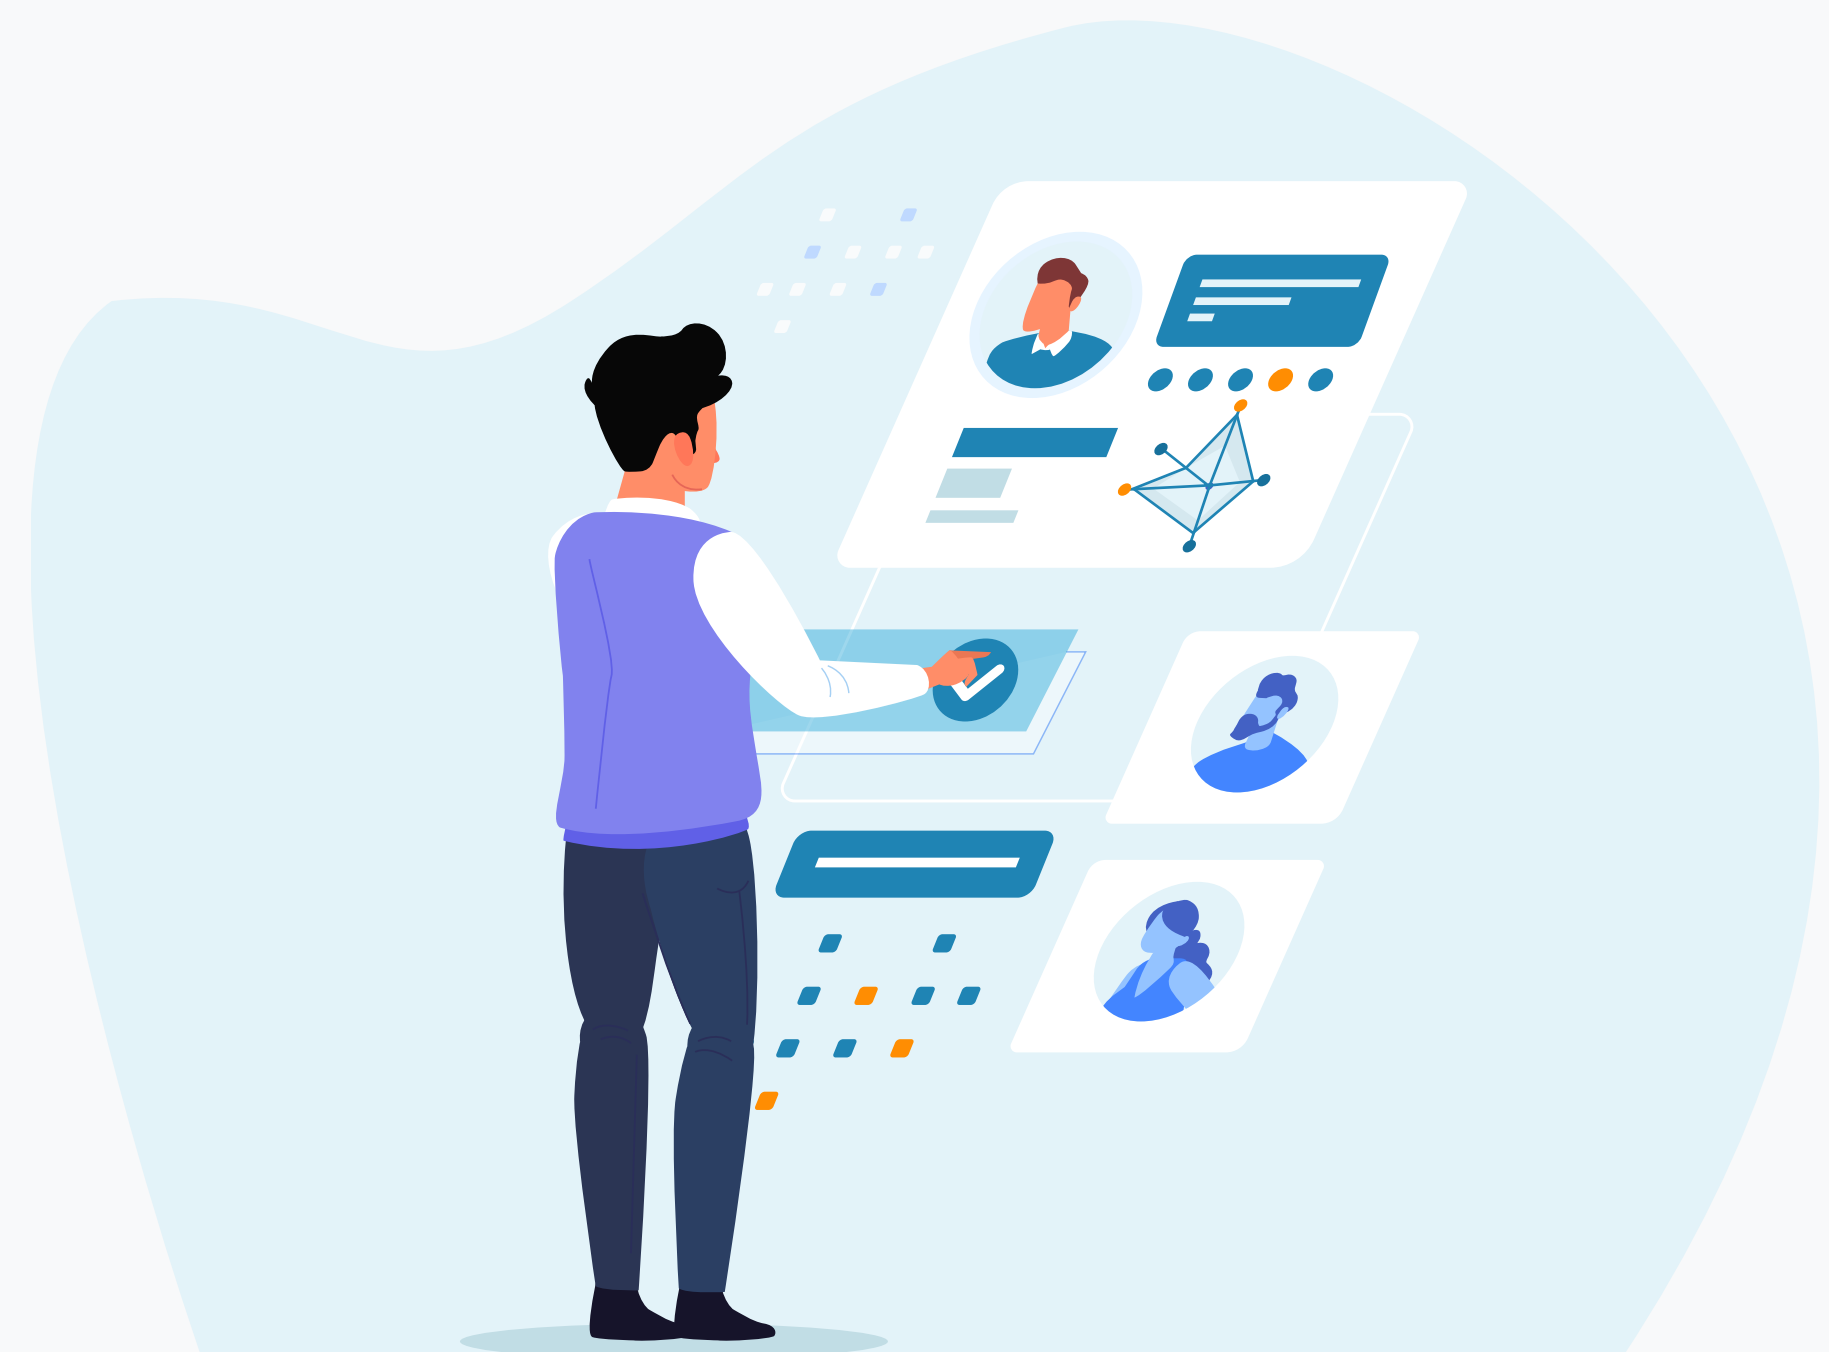

Key Impacts

Human Resources

Create a balance between efficiency and innovation in your organization by adopting digital tools

- Employee Onboarding
- Attendance and Time Sheet Management
- Payroll Processing
- Performance Management

How Digital Transformation can Reform Human Resource Processes

- Implement Hire to Retire process
- Automate HR processes
- Digitize Employee Experience - Background verification, documentation, Employee onboarding, payroll management
- Manage Attendance and timesheets
- Manage attendance remotely, contactless
- Allocate assets

Make Onboarding Simple

- Automate daily tasks for employees
- Review employee engagement - Attendance, Leave records, Timesheets

Reinvent Employee Experience

- Bring visibility to employee work and organization culture
- Develop a digital system for career development, learning and job transaction - execute processes from hire to retire

Improve the Recruitment Experience

- Seamlessly Manage new requisition requests, collate job descriptions and publish openings
- Interact with potential candidates using chatbots, personalize their application experience

Key Impacts

Construction & Real Estate

Develop a connected, integrated, and automated approach to construction and real estate management

- Construction Management
- Operations Management
- Asset Management
- Occupancy Management

How Digital Transformation can Reform the Construction and Real Estate Industry

- Vendor Onboarding and management
- Inventory and Work Order Management
- Stakeholder Management
- Project management
- Budget Allocation and Controls
- Asset Management and Maintenance

Build efficient Workflow

- Plan tasks, take approvals and start the action-all as easy as 1-2-3
- Track project progress actual v/s planned

Project Controls

- Onboard vendors faster
- Increase accountability- Assign tasks, build approval hierarchy
- Establish transparency in procurement process and cost control

Time Management

- Assign Manpower, Identify shortage, Overtime details to complete tasks
- Create and share construction milestones to finance team - automate payment milestones

Key Impacts

E-Commerce

Keep up with the fast paced e-commerce environment - adapt your business offerings to meet the needs of your customer demographic

- Vendor Onboarding
- Order Management and Fulfillment
- Reverse Logistics Management
- Warehouse Management

How Digital Transformation can Reform the E-commerce industry

- Onboard Vendors/Suppliers
- Manage Inventory, Warehouse
- Order Management
- Manage Supply Chain and reverse logistics
- Assess Quality Compliance
- KYC

Fulfill Orders Effectively

- Optimize supply chain to meet demand
- Utilize technology to manage each step of supply chain – inventory management, warehouse management, delivery etc
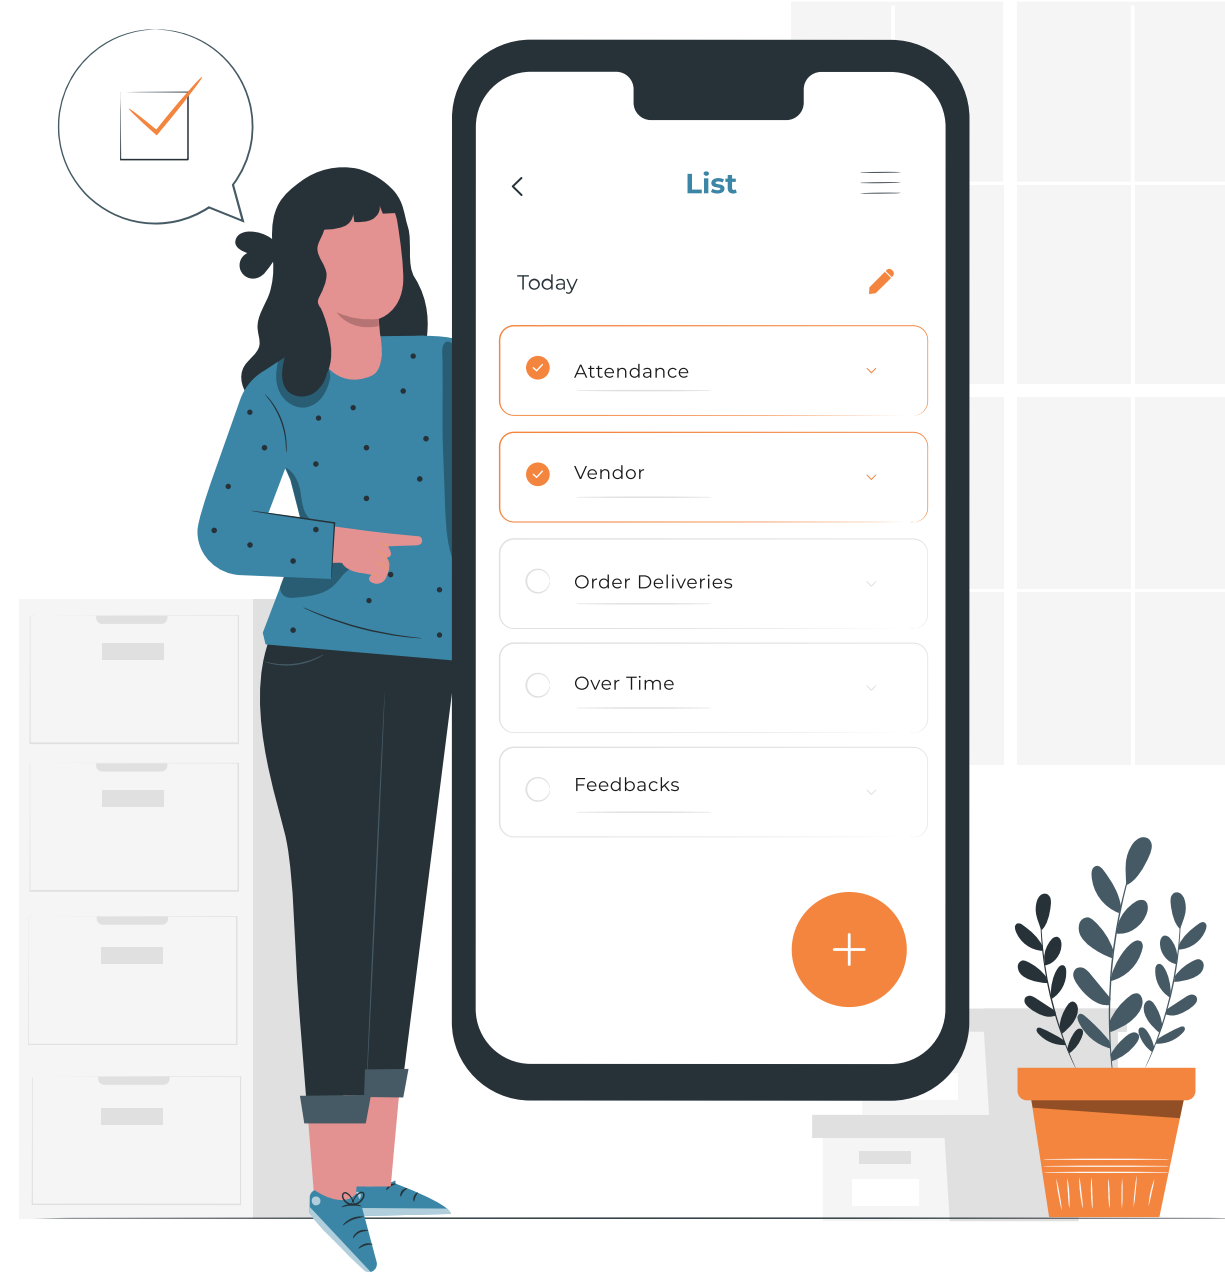

Handle reverse Logistics Effectively

- Manage return requests- from pickup to warehouse
- Track and control payment related decisions

Increase Savings and Profitability

- Increase profitability by optimizing infrastructure and managing inventory
- Reduce reverse logistics - offer transparency on product quality, cost, delivery timelines

Key Impacts

Facilities Management

Develop an integrated, efficient and transparent system to automate daily, weekly, monthly tasks to deliver a seamless occupier experience

- Attendance Management
- Project Management
- Vendor Management
- Feedback Management

How Digital Transformation can Reform the Facilities Management Processes

- Onboard and Manage users
- Attendance Management
- Stakeholder Management - Task Assignment and tracking
- Work Order Management
- Project management
- Feedback Collection and Action

Efficient Resource Management

- Plan tasks, take approvals, start tasks and assess work quality
- Assign task internally and to external vendors

Transparency across stakeholders

- Maintain daily, weekly, monthly logs for internal audits and for client approval
- Create anonymous feedback system-enable accessibility to all users

Reduced Turnaround Time

- Resolve open issues faster- identify stakeholder, assign task, assess work quality without any bias
- Deliver company's service standard each time- with no areas left unattended

Key Impacts
