DATA DISCOVERY AS A SERVICE
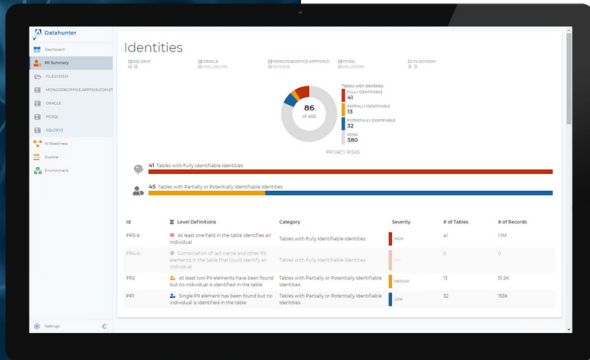

APPTION

Organizations choose Apption's Data Discovery as a Service (DDaaS) to:

- Perform urgent Data Discovery and Classification
- Speed up compliance with Data Regulations
- Build the case for their own Data Discovery capability

Whatever the reason, DDaaS provides rapid, accurate, and deep insight into your data. This highlights the risk , opportunity, and solutions to make your data programs more meaningful, secure, and cost effective.

For over 15 years, Apption has specialized in data. Today, our team continues to focus on both small and large scale data initiatives from business intelligence to data lake implementations. Leverage our service and proprietary technology for your own Data Discovery and Classification requirements.
