

ERP Deployment for Preclinical Life Sciences

Microsoft Dynamics 365

The development and preclinical state for a growing Life Sciences company is as exciting as it is challenging.

As your company grows, the business grows too, that means more attention must be paid to systems and processes supporting the business side — accounting and finance, supply chain management, payroll, and compliance.

If you are a Life Sciences company approaching or in the discovery or preclinical phase of your evolution, Argano can help optimize finance and operations, supply chain management, and other mission-critical business functions with an implementation of Microsoft Dynamics 365.

Why Argano deployment offering?

Our deployments are a repeatable process that we can implement quickly with our industry experts. Everything you need to automate and fine-tune finance and operations at this stage of your growth is included:

- General ledger functionality and features
- Cash and bank account management
- Accounts receivable and accounts payable automations

- Procurement and sourcing automation and optimization
- Project management and accounting

A future-proof platform

Built on Microsoft Dynamics 365 means your solution can scale and be extended as your business grows and changes.

With Argano as your implementation partner, you'll also benefit from being able to add custom extensions, for example, workflow automation, data collection and analysis, customer engagement, and customer service.

Start with an assessment

We offer a free, one-day Preclinical Life Sciences Assessment providing a defined project proposal to deploy an ERP system and preparation for future commercialization.

Already in the clinical phase?

Is your organization entering, or already involved in, the clinical phase and need help preparing for the FDA Validation process? Argano has a proven solution and the industry expertise to assist in this complex governance phase. We also can help extend your ERP system with our Electronic Batch Record tool to automate batch record processes and deliver new

Benefits:

- Tailored ERP solution for preclinical Life Sciences companies
- Automated and optimized finance and operations
- Scalable, customizable, and future-proof solution
- Free, one-day assessment to get started

levels of efficiency and insight across the board.
