

# Power Apps 3 Day Proof of Concept

Working alongside your team, we will build a Power App that demonstrates how the Power Platform delivers measurable business process improvements and cuts through the knot of process complexity

During this 3-day proof of concept, we will work with you to analyze and improve a business process. At the end of this engagement, you will have a working Power App solution that clearly shows the type of measurable improvements you can expect when you move forward with a full implementation.

## Agenda

- ◇ Review the business process you want to approve and define how we will align with and measure the improvements you are expecting
- ◇ Design, develop and review the proposed solution
- ◇ Deliver a POC review session that shows how the solution delivered the expected results

## Deliverables

- ◇ Fully functioning Power App that works with the rest of the Microsoft ecosystem (Teams, Automate, etc.)
- ◇ Presentation that details the improvements delivered by the POC.
- ◇ A list of the requirements and business objectives that were met by the solution.

For the past 10 years, The Digital Task has been a Microsoft Gold Partner focused on modernizing how our clients work using the Microsoft Ecosystem.

We achieve this by focusing on industry leading technology and combining it with our expertise and experience in order to improve both private and public sector performance.

Our delivery methodology is business value focused while also accommodating for the need to tailor processes, people, technology and culture so that they are well-designed and fit for purpose.

Our commitment to collaborative and trusting relationships with our clients has been the key to our growth as a company. Our first client is still our client.
