

Introduction

The purpose of this white paper is to describe the integration of SAP S/4HANA Cloud using SAP BTP (Business Technology Platform) as a communication interface to integrate the arcana solutions document server for compliant archiving. The integration is based on the CMIS (content management interoperability services). This integration provides a complete solution for businesses looking to improve their operations, manage their data effectively, and meet regulatory requirements for data retention and archiving.

SAP S/4HANA Cloud

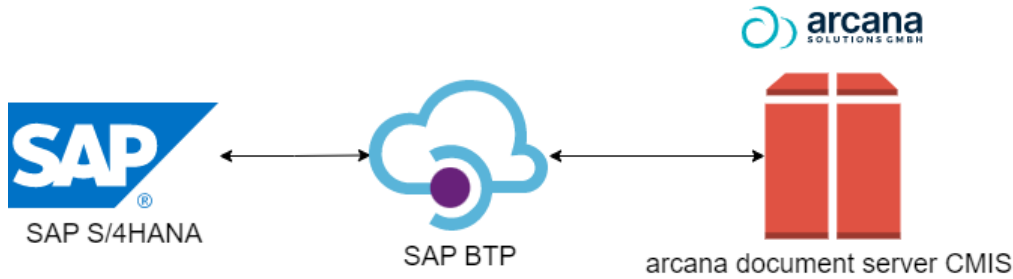

SAP S/4HANA Cloud is a next-generation, cloud-based enterprise resource planning (ERP) system designed to help businesses simplify and optimize their operations. The system provides a comprehensive suite of tools for finance, logistics, sales, purchasing, and other critical business functions. With SAP S/4HANA Cloud, businesses can streamline their processes, gain real-time insights into their operations, and make better decisions with the help of advanced analytics.

SAP BTP as a Communication Interface

SAP BTP is a cloud-based platform that provides a secure and scalable environment for businesses to develop, run, and manage their applications. The platform is designed to be the foundation for a wide range of SAP solutions, including SAP S/4HANA, and provides a variety of tools and services to support the development, deployment, and management of applications. As a communication interface between SAP S/4HANA and other systems, SAP BTP provides a secure and scalable environment for data exchange and integration.

arcana solutions document server

arcana solutions document server is a powerful and flexible solution for document management and archiving. The system provides a centralized repository for all of a business's important documents, allowing for easy retrieval and management of critical information utilizing the CMIS interface. The solution is designed to meet the strict requirements for data retention and archiving set forth by various regulations, including the European Union's General Data Protection Regulation (GDPR) and the Securities and Exchange Commission's (SEC) rules on document retention.

conclusion

The integration of SAP S/4HANA Cloud, SAP BTP, and arcana solutions document server provides a complete solution for businesses looking to improve their operations, manage their data and documents effectively, and meet regulatory requirements for data retention and archiving. By combining the strengths of these three solutions, businesses can streamline their processes, gain real-time insights into their operations, and make better decisions with the help of advanced analytics. Additionally, the secure and scalable environment provided by SAP BTP ensures that sensitive data is protected, while the compliance features of arcana solutions document server ensure that businesses can meet their regulatory obligations for data retention and archiving. Furthermore as arcana solution is using standard interfaces only a vendor lock will not happen.

what's next

Try our test and integration subscription to get familiar with the easy integration and use of the arcana solutions document server. For more information of the CMIS-Interface and capabilities you will find a complete documentation of the API here:
