

ARCHY

AI Driven Assistant

Innovate, Integrate, Experience, **Today.**

Architech

THE PROBLEM

Navigating the Chaos of Product Management

Product management, while flexible and collaborative, often faces challenges such as backlog management complexity, task prioritization issues, identifying dependencies and data overload, which can hinder productivity and delay project timelines.

Overwhelmed Teams

Scattered Data, Lost Insights

Missed Deadlines and Opportunities

Security and Compliance Risks

In a world where data-driven decision-making are key to staying competitive, traditional project management tools fall short. Teams need a solution that not only simplifies workflows but also empowers them with AI-driven insights, ensuring every project is a step towards success.

THE PROBLEM

Navigating the Chaos of Product Management

**Writing
user stories**

**10-20 hours
per week**

**Writing
acceptance criteria**

**10-20 hours
per week**

**Researching
existing features**

**10-15 hours
per week**

**Generating and
refining new ideas**

**3-5 hours
per week**

On average, product teams spend approximately 10-15 hours per week researching existing features, understanding user needs, and evaluating technical feasibility.

THE PROBLEM

Navigating the Chaos of Product Management

In one week...

... for one bug 

2 hours per bug for investigation and debugging.

On average, coding bugs take around **3** hours, data bugs take **6.5** hours, and design bugs take a little over **1 day** to resolve.

average of **4** hours per bug for fixing

If we encounter **5** such bugs per week, the total wasted effort would be approximately **20** hours. 

THE SOLUTION ARCHY

Archy is an AI product development team member and assistant. It helps teams make new features by looking at what they need, writing tasks, and fixing their plans. This reduces time-to-market, increases product quality and saves money.

VALUE PROPOSITION

Navigating the Chaos of Product Management

**Writing
user stories**

**10-20 hours
per week**

**Writing
acceptance criteria**

**10-20 hours
per week**

Saves avg >20 hours per week per team

**Researching
existing features**

**10-15 hours
per week**

**Generating and
refining new ideas**

**3-5 hours
per week**

On average, product teams spend approximately 10-15 hours per week researching existing features, understanding user needs, and evaluating technical feasibility.

SAVINGS ESTIMATE

Resources put into backlog management

Org. Size	teams	hours saved per week	hours saved per year	days saved per year	saved per year
micro	5	100	5200	650	\$ 195,000.00
small	20	400	20800	2600	\$ 780,000.00
medium	50	1000	52000	6500	\$ 1,950,000.00
large	150	3000	156000	19500	\$ 5,850,000.00
enterprise	300	6000	312000	39000	\$ 11,700,000.00

THE SOLUTION

Revolutionize Project Management with **ARCHY**

AI-Powered Automation

Archy simplifies project management by automatically generating Product Backlog Items (PBIs), managing epics, and creating user stories, freeing teams from mundane tasks and allowing them to focus on what matters most.

Actionable Insights in Real-Time

With Archy, gone are the days of making decisions in the dark. Our platform provides instant access to project health, progress, and potential risks, enabling teams to make informed decisions quickly.

Predictive Analytics for Proactive Planning

Archy doesn't just tell you where your project stands; it predicts where it's heading. Utilize Archy's predictive analytics to foresee challenges, optimize resources, and ensure your project's success.

Seamless PML Integration

Designed to work within your existing PML environment, Archy enhances your workflow without the need for additional tools or platforms, making it a seamless addition to your project management toolkit.

Archy is more than just an AI assistant; it's your partner in achieving project management excellence. By automating routine tasks, providing deep insights, and predicting future trends, Archy empowers your team to deliver remarkable results with less effort and more confidence.

PRODUCT OVERVIEW

A Deep Dive into Advanced Features

AI Model Training for Precision Guidance

Tailored Insights

Archy's AI models undergo continuous learning, tailored to your project's data, providing precise, actionable insights.

Predictive Analytics

From forecasting project timelines to identifying potential bottlenecks, Archy turns data into a strategic advantage.

Seamless Integration with PML Tools

Plug and Play

Archy's deep integration with PML tools ensures that teams can leverage AI capabilities without disrupting existing workflows.

Enhanced Agility

By embedding directly into your PML tool environment, Archy facilitates real-time decision-making and Agile methodology adherence.

Data Protection and Isolation

Self-Hosted Security

With the option for self-hosting, Archy allows enterprises to maintain control over their data, ensuring compliance and security.

Isolated Environments

Archy supports data isolation, providing teams with the flexibility to work in secure, siloed environments within the same organization.

User-Friendly Interface

Intuitive Design

Archy is built with the user in mind, featuring an interface that's as intuitive as it is powerful.

Customization at Your Fingertips

Tailor Archy to fit your team's needs, with customizable dashboards and reports that highlight the metrics you care about most.

AI-driven platform designed to bring efficiency, insight, and security

Archy is more than a tool; it's a transformation. With advanced AI model training, seamless Jira integration, unparalleled data security, and an intuitive user interface, Archy empowers teams to navigate the complexities of product management with confidence and clarity.

BUSINESS MODEL

Archy's Path to Profitability: A Strategic Business Model

CORE OFFERING

Archy operates on a subscription model as part of PLM tools, providing continuous value to our customers through regular updates, feature enhancements and dedicated support- This model ensures predictable costs while allowing flexibility and scalability for users.

TIERED PRICING STRUCTURE

Catering to a diverse range of needs, from small startups to large enterprises, our tiered pricing strategy ensures affordable solution across different markets. Each tier offers increasing value, from basic automation to advanced AI-driven analytics and customization options.

ENTERPRISE SOLUTION

Recognizing the unique challenges and opportunities within each organization, Archy offers additional deployment models through PaaS offering, customization services and expert consultations. These services not only enhance user satisfaction but also provide organizations opportunity to leverage their data for AI modeling in a secure way.

PARTNERSHIPS & INTEGRATIONS

By establishing strategic partnerships with other SaaS providers and integrating with popular tools and platforms, Archy aims to become an indispensable part of the broader project and work management ecosystem.

SCALABLE MODEL

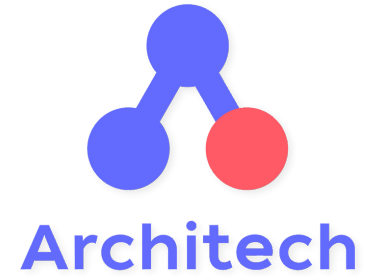

Archy's innovative approach to product management is matched by a robust and scalable SaaS and PaaS solution, designed to drive growth, foster customer satisfaction, and ensure long-term benefits.

COMPANY PROFILE

Our mission is to (re)design your experience, transform business models and practices by delivering complete digital innovation and integration, making your business more efficient, adaptive to change and scalable.

Architech is a company with highly adaptable and skilled experts who use technology to solve complex problems facing businesses today.
