Commercial Cloud to Government Community Cloud (GCC) Migration
Dynamics 365 Finance & Supply Chain Management (SCM)

Microsoft
Solutions Partner

Accelerate Your Path to Compliance

Migrate Microsoft Dynamics 365 Finance & SCM to the GCC with Arctic IT's proven methodology

Federal, state, and regulated organizations increasingly face requirements to run their ERP workloads in certified environments. These compliance standards include **FedRAMP High, NIST 800-171, DFARS 7012, and CMMC 2.0**.

Microsoft's Government Community Cloud (GCC and GCC High) provides a compliance foundation, but migrating Microsoft Dynamics 365 Finance & SCM from commercial to government cloud is not a simple lift-and-shift.

Arctic IT specializes in guiding organizations through this complex process. Our experience with rare Commercial-to-GCC migrations, executed in partnership with Microsoft, will help you **reduce risk, accelerate timelines, and minimize operational disruption**.

Compliance Comparison Chart

	Dynamics 365 Commercial Cloud	Dynamics 365 GCC / GCC High
Customer Eligibility	Any	U.S. federal, state, local, tribal gov, and contractors (subject to vetting)
Datacenter Locations	U.S. & Outside the Continental U.S.	Continental U.S. Only
FedRAMP*	Moderate	High
DFARS 252.204-7012	Not Supported	Supported
FCI + CMMC Level 1	Self-Attested Only	Supported
CUI / CDI + CMMC Level 2-3	Not Supported	Supported
NIST SP 800-53 / 171**	Partial/Not Certified	Yes
CJIS Agreement	Not Supported	Supported (GCC High Only)
Customer Support	Worldwide / Commercial Personnel	U.S.-Based Personnel
Directory / Network	Azure Active Directory, Public Internet Routing	Azure Government Directory, U.S.-Only Network

*   Equivalency, supports accreditation at noted impact level
**   Organizational Defined Values (ODVs) will vary

What We Deliver

Environment Provisioning
Tenant setup and licensing validation within GCC or GCC High

Database Migration
Secure export/import of financial and supply chain data into the government tenant

Customization & ISV Re-deployment
Rebuild and validate customizations, extensions, and integrations against .us endpoints

Mock Go-Live & Testing
Iterative cutover rehearsals to ensure data integrity and system readiness

Final Cutover & Hypercare
Seamless production migration with post-go-live support and transition into ArcticAscend account management
